8/20 - 11pm

we posted this today just aint write at all here & yeah like just again the totality of this, no idea what to think, but to suffer this much be wrong......... in all ways like I cant win cos they screwed me over and mad simple to anyone with any knowledge.......

& its just again another day, where like I aint know what to do, spent all day just looking over this, theirs so much gl.... lol but it is interesting and has key pts, fact is nobody will read it, but w. whats going on here thats what I mean, no clue what you think is the answer, but it aint all this....... the answer be simple af........ nature is medicine.....

like just really here, like that I aint feel good at all & As I keep saying like my mind is stuck in ADHD paralysis....... like again just all of this, insanity, dont know what to do cos the ADHD meds helped...... just cause this be our paradox, like thats messed up... cos aint nobody know the truth & take it here like me..... but what choice have I had, what choice do you have, what choice do I have in not forgiving......... like what choice do I have in the tablets and shrooms opening thy mind or the entity manifesting..... what choice does anyone have if nothing here be free......

I was gonna start a new one cos with all these images autosave be turned on & dont wanna keep just doing this tbh but its gotta mean something to me..... like cos its just life when you do nothing & meditate like anyone can see like this , life is way too fast paced and chaotic and repititive to me without medicine in any form to feel comfortable in any way, like may not be for you, but it is for me, and again why should someone have to suffer, IDK what else to do here, and again flip side, how hard is it to just be like yo lol and do nature with someone, that is a form of the initiation tho and I aint know any other way and since all of this here, like I couldnt again just feel worse, when again we know this, so it is beyond fked, like life could move on, change, but all this is cause of what iv written and whats happened, like what if you didnt know what to do in life or wanted to do something and it aint happen yet or like again just yeah like that is the meaning of it like thats what our life path be.... and its not recognized , its just again its beyond dumb, what meaning of their in being alive like you know how chill life be, to like to do a job you like , like I had tho, and make money, and come home, and do shrooms or something like just I can again im burnt out times a million here............. like how chill it be to use shrooms and just chill like life was good once before tho or simply oh have adhd meds here, take one , bam I feel better, you aint know how evil this is tbh, Iv had no choice but to write it out.........

so idk what to do, like again what am I suppose to keep doing this , nah its like I dont know what to do tho living here and all this, like just and nobody will be a friend at allll like just all iv seen be enemies here, that dont contain wisdom or share............ when that is what makes life fun, like we are just thats who we are here........

I feel like again idk just writing helps but again it is sooo much like idk what to do bcos again anyone with a heart and did read this or look into it would know , they know something here about this whole thing, all of it, like basically its the entity manifesting which is how we know what we do tho & just like the teachings of thoth all say it, the books right like that is truly the fucked up part that the wisdom exists, but half of anybody , like nobody on YT knows but I do is the paradox...... again we aint just claiming something, like cant show it all their, like how else do I show it if it aint the full truth like its super interesting tbh....... and yeah like just again aint no1 gotten closer to thy full truth of it all , but thoth knew.... like to suffer this much and feel this unwell bcos of this all , super super unfair and neglected here..................

like that again maybe it could be, maybe im completly wrong, maybe it will make something be, we aint ever wrote as much until all of it like its the tablets reacting as you see the creator does when you believe in it......... rewarded w. immortality but yeah this is like just wrong .... we aint ever have an option here cos of this all, like their is no pt to anything cos the corruption in the 1st place,

its just you aint know how dangerous this be to have this be my thoughts and my reality be this, like I cant hold on here.... never fucking feel good like its like constantly being sea sick which again motion sickness like it does happen to me always and adhd meds helped me in all ways....... like their is no pt without it tbh

like that legit just nobody cares.........when we share our full truth, maybe cos you assumed or I did but thats how we play all we got is thoughts....... like what you doing if this was your thoughts and you had the wisdom , and how unwell I feel everyday here........... who is nice enough here to open up about it and share thy paradox..... to have thy mind, and again like we be neglected here.......................... like how you weigh life be like how you helped others and not this tho........

like that again the whole pt is again even back in 2022 like its too late, like just it works, might chop off some life, but life be mad diverse, gotta live it while your here...... like that bcos I dont feel good without the cure here .... so you should just let someone go in a way that makes them happy & comfortable.......

it is worth having 1 good day over all these bad ones............. like we always again it just works, its magic, having adhd meds and this aint, like its so fucking wrong, just cos it doesnt work for you or help you be comfortable, thats our story here.................. like this is why this happened to me........... and its again like just you cant run from the truth here...... it will get you like the entity lol... but yah im super depressed and just I would never again do those meds when shrooms exist, everything is so wrong when the answer is so simple.......... like again how much do you believe.... we always believed and nothing happened like but again just 1 mind , 1 person can change your whole life here , having thee mind.............. like life just this aint going good here atleast again im trying to get thy word out here.........

going to bed soon its 1130pm but yeah idk just it is that like the paradox be all things be changeable and its in thy mind, again just they rather see me miserable here than do better for myself is what it all says

just we share everything but yah posting on the archive too like sometimes again it dont go through tho, it is the perfect site for it in a way, like that sometimes I gotta give it to my phone the file & do it, like it dont go through always legit pain but yeah like dont know, all I know is we just ponder... its dumb to not think I guess, like that is what alchemical thinking be..... thinking if it aint for one thing it could be another, or again just opposites or the double thinking monkey lol.......

I just feel like the message is meant for the one and none other also like but yah idk noone writes like this cause nobody has these experiences which is fucked like what do I do, I get zero help and again weve tried like this is all beyond fucked...... for dumb ass reasons here too like honestly, like this happening and knowing what actually was happened just it changed thy view on everything, it is the only truth their be...... like losing my job cos of it, didnt even get to talk like shit in totality is dumb af, like cos we went through that with my ex tho...... like but who becomes mindful and gets fired here like who follows their heart and nothing is , who trys and doesnt get the right help and gets pushed down more to a way it never helped, like picking yourself up out of light is even again trying to talk to somebody to get thy meds back and it didnt help, like I have no outlook on life at all but making it through the day..... and again i dont give a fk about anything like my mind again its neglect and corruption what has happened, like all we believe in is medicine...... like just everything like dont know what to do here really , it aint getting easier or better here , like I just feel worse everyday...... even when I have hope, again stepped on as if, regardless right like just something other than this should be...... we aint again actually be friends or talk to anyone since this happened bcos this happened and whats happened be wrong af, what if you were me, it aint an excuse but the truth....... wouldnt see reality as it is if it wasnt, prob is ppl should just be nicer like just these thoughts here, its just again got adhd and it hurtful af we aint got the cure , dont have motivation like beyond ignorant here... you could save somebody and help them and its not...........

8/21 - 155am

legit we cant sleep rn we took 5mg melatonin like 2-3 hrs ago , just took 50mg seroquel like just we turned on our tv tonight & put dark on, cant fucking sleep, life sucks, im miserable, nobody cares, aint got any again adhd meds help huge, like im so stressed you aint got no idea of these thoughts here............

I was gonna take a benedryl but didnt have 1.... instead, its like again same thing in theory...... 50mg seroquel is mad light dose and we have like 50 left but I dont have a dr and again dont know how to think if you go to a dr and they over ride your reason without listening to you, to profit on you, like been cured before just noone wants to hear the entity out here and its like life shouldnt be like this, medicine exists, like what if it was the wrong medicine bipolar again who gains all that weight, like shit be more dumb than anything, like I have legit zero outlook on life and its played like oh youll get over it, but the truth cant be altered.........

like that my body been sore too like its always something or a headache like im so aggitated here, obv something is wrong & nobody cares................

like its taken for granted when I do write or speak here............ like just again its why weve went back to zyprexa before at times living here....... like so I dont care, but its like how am I suppose to have a future here , all this did was demean me here .... when again, who the fuck comes with wisdom here and im treated like an idiot.......... like that their is no options, no friends to talk to, nothing at all to fucking do here, we do be going nuts here like just dont know what to do with myself........ =(

just even from last yr, like its the difference between w.e having a job, but also like taking adhd meds with bipolar.... than taking bipolar alone, like bipolar alone I give 2 fucks about anything, never has helped me once in life, take adhd got my electrical license, like worked all the time, didnt care until I was fked over, like again just as if the other side cannot accept thy truth.......... =(

like I said simple, but everyone on this planet makes this more retarded..... like their is nothing to say but you arnt a friend...........

dont even again cos of it all, if I want to get help like you know how dumb it is for me to try when I have and been shut down when you asked for something that helps, like IDK wtf imma do and you play like oh its part of the magic trick or something but my mind...... its dishonest af to find a cure and then to suffer like this.......... like idk wtf imma do............... it was all fine before this went down in 2018

its again almost like this perspective, others tried to fuck thee over here and the entity made sure it didnt happen, gave me actual wisdom, like believe it or not tho..... and like again how do you tell someone this when they know the truth and was a friend and shared wisdom here............ so w.e believe what you want I guess, but its most evil to feel like this mentally, like legit we dont wanna be here at all, their is no meaning to life...

11:20am

writing all this again publishing it online, generates paradoxes...... like anyways all of this again shouldnt of even happened like we didnt do anything wrong and was always wrong doed here............... like the paradox couldnt be more simple........... people are evil af here.............

like again its just as if learning the truth you cannot return, what am I to do if this is thy experience...... like the fact here is idc whats been happening, the facts prove that you do not give a fk , and so I dont either here, you can piss off legit.......... like in all honesty, just you cannot accept thy heavenly mind, like you are jealous of thee............. mad that my heart is lighter here......... mad about how we played here, like that aint what love is

cos idk what else to do, their are paradoxes layered here, like that if you really let someone sit here & suffer, you are evil, and theirs nothing more to it than this, their can be no returning, like you done crossed that line here, me, like id rather not be here

like that dmx let me fly song, sometimes its better being thought your dumb, like but we are not..... again alll of this was generated cos the algorithms of simulation regardless of what you believe....... like again just DMX came into thee life bcos of call of duty warzone.... like its what opened the pathway to look into it more back then tho and that is like again we used the stream...... fact is their is nothing to say but you wanna believe & assume some BS rather than knowing how the mind does work here............ like in all ways, idc what you invested into this pathway, like I will burn you back here, and by this, like have nothing to do with thee, like that is how I kill you.............. cos ik shit be happening, and thats the last thing you do to somebody who has shared wisdom......

if you had even .01% clue here how much our mind is struggling you wanna assume oh this is part of the magic trick here, it aint, letting something suffer here aint, you got it alll wrong and dont want that like you think that id forgive here, I will not............ like idc how much love their may be on this side here, not being here for thee and letting this be, is your downfall here.......... if you cant be their for the one who got love, you don fucked up............... like idc if I have nothing cos guess what, it wasnt my choice, I tried to again protect thee job, oh we have another mission, like gonna take away the meds until like idk like alls ik is for not sharing here, you aint getting shit here..... we did nothing wrong, like as if your mad how my experience is played out here, but what choice do I have dumbass, like you are a fool..................

when again we dont just sit here and not speak out against thy evil, we do, and thats the difference here, like promise if you had 1% clue of thy thoughts, like this wouldnt be still happening, like that you have no fucking clue how reality works here, either way it says your evil and guess what I aint gotta be your friend, I aint care if I aint have shit here, to let someone suffer, is what you dont understand, you dont understand how simple the initiation be........ hello fucking nature ya dumb fuck, like w.e think what you want, Id just rather not be here, how does that make you feel that that is how you make someone else feel here, asshole, legit like w.e think what you want here, we don tried...........

1235pm

just dont know what else to do or believe in, like we need medicine, and had medicine that worked until all this, all this is beyond dishonest tbh, like just that again I have no idea what to do in life one bit bcos aint a single soul been a friend here.... and all we did was follow our heart like really my mind does not feel good, the greatest gift you could do or perform to someone that saw an entity, is give them magic mushrooms, a fungi, how simple, like we need something here, it aint gonna get better without nature, like the wrong meds we will use like have some common sense and think here............ like I dont know what to do , and what greater evil can their be here than all this, like you got it ass backwards here........... cos all we have is thoughts...... like what am I to do here, im going insane in thy brain here, and its not a joke the slightest, the best thing you could do is show someone love and get them what they need here, and the opposite is, like again you cannot alter the truth to all of this, its heavenly and im treated the opposite here

legit dont feel good at all here.................................. like I told my story we aint listened too here, their is no love, their is no caring for one another here............ cant say we didnt try here..................... like its completly wrong and evil all this... cos we be right on alot here..... asshole

10:30pm

I aint happy at all here, like it aint a joke......... cos this is how it works, how reality manifests itself here......

like that I publish this last book I call it, its just some writings here.... but that like idk just again even posting on X while private... like we were public forever, and to release thy thoughts into the Matrix........ like that you aint even have a clue here of how my mind feels.... or of my thoughts.... and to have this angle of reality here...... like its beyond messed up..... like that again anyone with a brain can see the truth to all this........ and I aint been treated right in any way at all here.................. like im beyond pissed off, Like how do you expect someone to function, when they took the correct meds before, like you aint got a clue here......... to seeing the entity, you do not have a clue............................ it is for myself, like in this way of, nobody can tell the story for you here...

it aint getting better, only worse, bcos this is the thing about the truth....... it cannot be altered, I wouldnt be just again like saying oh this & that, but I do not feel good here one bit................................... nobody cares, like I do here, as in, were all on planet together here, but nobody wants to help another, what can another do, share, like again just it is the paradox, must be open to flower of life, like and im right, I dont know what to tell you here..............

just all of it, like we released mininum , like my last book was atleast 400k characters and like 70k words , to speak on it all & how my mind thought through this....... like again the thing here is anyone can read it, esp if I put on the archive........... I dont know how else to express myself........... but to write here cos im always alone............ nobody is here for thee, like just idk what you think is right and the right way, but it is not this, if it was this way, they wouldnt of shown nature in egypt and mushrooms raising the sunpower, like stop kidding yourself here, we got it right, and all that can be is the truth to be forced outta it, as in, like we really have dropped people before, cos they crossed a line here, like my ex......... like that is something you do not do to me here, cause everybody got parameters............. and limits here...

like as if writing can cause even more confusion, like we dont talk much, so in our thoughts is like 100x more active than anyone else in my mind....... esp having ADHD and taking the cure before, heck even if im not given the ADHD cure, right like we can shroom, smoke some good weed, but none of that helps me here, in life, like you aint know how again like how much do you wanna keep kicking me when im on the ground here........... what am I suppose to accept being bullied here..... like you got it assbackwards and thats too anyone and everyone here, im nice enough to show you, dont have to be, but we do be right, and if that is the case, then again, like just the difference between a friend & an enemy, is experience....... like a friend can turn into an enemy, again just the world is too much for thee adhd brain, like no1 that I actually want or like, gives a fk about me here, like you dont know what I deal with here in my mind, its why we stay to ourselfs here..

im more nice than you can imagine here, again if you think you gotta push thy buttons here instead of helping, like you done lost already, you aint a friend here.............. like what you know about helping somebody out here..... you dont, you aint even know what love is, if it smacked you in the face telling you that, just like w.e think im joking here, pft I aint even wanna be here since 2018 since they fired me for being harassed.... whatever you think reality is, it aint, and your an enemy here

right, this is again iv been open is the difference, aint gotta be, aint gotta share a thing, but im telling you what happened, and for that again should be listened too here and im not, like I aint ever been a follower here and you would know that if you knew me.... and you dont

just again, picture this, like again an entity comes to this person, flys out their body, all of it, like yeah maybe again like it just was real is the problem here..... weird af everytime I go on conspiracy tho randomly like the other day, bam ariana is their ahahha like really fk you thats my thing to go look what ppl think..... but yeah like about weight loss and that it happened like 3 days ago here & it happened tho like weeks/months ago , only when we talk about her, but I think again trust nothing, a person with any knowledge can even have bots, like what, that just how reddit became a thing was cos the creators , pretended to have other acts and post stuff to get it active.... lol, but nah so that dude the lead guy from smashing pumpkins was on conspriacy only reason I press play & he said like same shit, he seen that, & yah idk if I mention it, I think I did in my other book just cos, tis the season I guess..... he said just idk he seen shit, ppl can lie but I show shit ...... dont know when it was but its interesting thats all wanna use nature & chat.... lol =(

but where was I actually going here is that.... like you aint and take for granted here, to have this happen to me, like again for all IK theirs more to the story, but their always is, the creator is mad intelligent...... so intelligent makes shit look evil ..... emotions, but yeah just like again to show it, take time, and to share all the wisdom we found & to contain it in a bundle like on X in my bookmarks........ just idk we just again wanna talk to someone about it, but again we are not dumb, like we aint need no middleman here we can do the talking says the entity.... but just yeah idk, and that I know this is soooo much for someone to even be like wtf, but just this is what I was tryna say

thoth says solve my mystery, and I said it before, let thy curse, like thats what being taken for granted here, that curse......... the curse of how I always escape .... one way or another, but yeah like that its again, an entity comes to me, we done used nature, was open up what and formulas, like shared the truth..... and nobody cares...... like wtf would you do, we dont need again to bring it anywhere else but here like this is how and what happened to me , that like I show thoth the shadow going into thy body..... well again solve thy mystery..... says the creator, like we come presented with the truth and yeah nothing is, life gets worse........ I dont get it............ like someone who shows you the dragon in the sky and on their balls here and that basically the penis is the dragon in a sense....... like you aint gotta question their love and thats whats been, yet I get it, everything wont be but its the only thing that makes sense to me and its such a good wonder it got me pondering always, like if it aint that great in a way like we will pass until it is, or we will die with our legacy.....

like again to me, its just like they wanna bring me down cos like idk once you get something it means nothing in a way right like that is what it feels like but the excuses are not tolerable bcos of thy mind stress...... like that yeah idk, if it is or not, but ik it aint this here rn lol..... like just always why would you be against someone and in a way, idk like rap be like that, it aint always the best, it can motivate a single person, but other genres make you question reality like its all a spell.... and you aint again just our data be precise here , like just idk making music in general, the reason, ppl can do it fun, if you had or have money like you can tho, you can focus on it, but again if the way your tryna make a living is by that, like pft esp now a days, like things are different out their , in all ways...... but yeah the thing is again just reality aint, like cos the way money works, I dont get it all but its like again never gonna win here....... but we dont care about money cos we know the truth about reality lol..... like just that either way the only way is to live a good life, but yeah all my ideas could generate income.. games, movie, like the shadow be worth something here and we are no fool, this experience be like 1 out of 8 billion cos no 1 else is showing it except egypt........ like exactly what happened to me, to leave thy body and fly and see the shadow and again wtf it all clashed back then alls we ever do is share our side but theirs again just wanna enjoy life cos just idk this is all a scam and im too wise, the wisdom says to leave corruption & its what this is..... said that, and that until you are simply a friend, aint nothing is.............

like just idk all things rn, this is what a writer does tho, they sit their and just let the thoughts come, same with anything I guess, but yeah like that we could write a book, or this & that, make a game, lol would be easier with investors but yeah legit mad cool or again social media lol..... but our life is the book..... of thoth, like try to find someone with all this experience, we are waiting..... chances..... like again everybody be against thee in a sense, like thats what be wrong.......... like wtf shit is dumb af, we could be comfortable rn, cause we did work hard and got fucking screwed legit like it is I promise the only reason we hold this grudge, cos it is real, I didnt do a fucking thing, they could of fired me for anything here, posting to social media while public, like nah cos someone stared me down here tho................. like again an entity comes and they become mindful, they share how they see it, aint nobody do that, aint nobody a friend like me here, but yeah in all honesty, just nature has always been here, like just it is again the reason we know anything be possible I guess............ it just makes sense & none of this does...................... like idk, just nobody is like the ancientxthoth here tho......................... if they did they would write like me about their experiences, but just me...... again how much you wanna like think you taking when we just gona take it back here at end of day.... like just idk I could be evil af knowing this truth, so its also why we write, never know what life may bring, atleast we tried to get our thoughts out here.........................

just do you even have a clue here tho like this is legit again what reality is right here, the event horizon to thy blackhole, the parameters, alchemy barriers even be.......... like we are way too wise and trreated like nope, your thoughts arnt what is, like it is what it is, thats all anybody has is thoughts ya asshole but this like again it is tho cos when we go our own way in the algorithms again it generates this or that I block rec videos hide it all, like just cos thats what we do here, theirs nothing to do, so we set up our thoughts to win, but again it doesnt matter if no1 recognizes the truth here I guess, like I show you how to win , to avoid the dwellers here, like..........

hahah just again love chinx not even cos thy ex but just it is this paradox, who but me, but yah god body, again that line gotta mention it here I did on X but yah god body by french & chinx...... lifes a puzzle, wise niggas died tryna finish it............. like we finished it....... we found thy secrets, lol...... thoths the creator...... but yeah just again like a good song can be in the moment.......... got denied membership..... like why again the goat ..... lol and again its listening to it, Iv been relooking over what I publish since I publish it, bcos its alot of thy truth to thy thoughts, it can again never know, even if the views dont show, its possible to view something, again we put the energy into the matrix here........... but we always go our own way..... and yah but I cant take again its good like just what is thy purpose again that is what thy records say......... like lol.....music...... but yah dont want to go your way , we got our own story as I say...... need to shroom, and take adhd meds, and be like bam I got it... the idea ahaha... =(just yeah idk..... like I said, just life at this pt , what we lost for the wrong reason here, like just what has happened, its truly like evil af, we will go to death & then youll believe me, oh he wasnt joking around......... like he will burn me back, yep says the dragon......................... but ya we heard this song back in the day......... just again why is mac on coke boys 3....... like see what I mean here, like again just the world be wrong in the 1st place here is the issue like cos if it aint then it aint for everyone like thoth be for all here, but yeah just idk like I said just we liked chinx like in celebration pop a pill & get ya gaming on, ahahah =(im so mad you have no idea & again it cant be forgiven, just cos love is & if their was love, it would be, but theirs not so theirs none except my own rn............... but yah like just in totality, just idk we always questioned things and becos we came across mckenna like just like I said, I aint like others, but I could understand him..... and he just says it straight up, lived a life where he could shroom or do w.e like he be right on alot...... and just yah idk like cos that again just the truth cant be altered so to be curious enough to give it a chance, im given no props anywhere, like we aint even do coke and know all this, like again everybody wants to step on me like im in the moon here............ even thy enemies and thy friends..... which again we seperated ourself either way cos we aint ever have a choice, like we know we be right but aint nobody wanna vouch for that, cos they scared of the truth that we know......... just rly anyone if it ever was seen, would know, like they are right, in this sense of things... and youd have to ask why, or how.... well I tell you, I show you what the wisdom says, how just even again they worship the substance that causes death, bcos death is a chance for transformation, ... we got the wisdom on our YT like just idk........... just yeah like we are not believed when we should be I guess, all we have be thoughts and im given no credit on how we view it all I guess... or about our sitatuion, like...........................

to even put my truth into the matrix is what is most like again what would you do .... we know we be right here, thoth would be like fuck ya eat them flowers of life, yall be like the grinch..... for real tho...... like dont you know when you die the creator gonna say something about that right, like what would you believe in that is the truth, the wisdom hits so hard like ppl afraid of it...... cos not everybody got the light....... but yeah idk like I said we are not feeling good in our mind and thats what hurts the most here............. cause weve been given things that dont help, again the truth of me dont ever change here...... all we do is write cos their is nothing to fucking do and im not happy here, and the gita warns about stealing happy here...... like that again you aint know, it says that if they basically move on me here and I act with no resistance and without weapons like it will be my reward here and thats what theyve tried to do, is attack thy when we offer no resistance, like we dont want that ever, like I said our heart so open and our mind like that when I hit ye with the truth its like a magic spell entangling thee and binding thee to the earth itself, like that idk again cant change who I am here, but we found it all & given no credit....... like we just again know how to have fun, ppl wanna watch me suffer here, like bcos the thing in it all is again, having experienced death in this way & knowing like basically like we were shown yeah like again the world is too intelligent to begin with here the creator but yah like when you die again their is a process and that again this is how we recieved the key of life here , believe it or not, read the tablets, cos when it happen, just how I said like we just again bowing for the key like the glyphs showing them getting upgraded staffs..... like that bcos of the experience if this is a game & it is, it allowed me like in that movie , ready player 1 to get the key... and again just idk these paradoxes, I just wish something changed here..... I dont know what else to believe in since all this with her cos to my mind its the only thing that makes sense atm is bcos of the numbers, so like either again need someone to reprogram it bcos its been in my life twice like thats how much again this all happen before like just idk it doesnt make sense.......... but it does & im not belived................. =(like idk what else to think or do or say or write here..... its more of the same, and just yeah life was never like this before........ it could be different like wtf this is stupid af all of it, =(

I guess its just again like paradoxical as if again this happen cos of that or this happen bcos of this..... like just again idk cos its in thy memories cos of it, so idk its all about a vibe like thoth says....... like really I have no fucking clue what to think here honest lol.......... like again if this is thee life, and how I choose to go at it, like idk we can vibe in a way, but life never changes here, like bcos idk you do gotta work with what ya got ahaha just its the truth...... so why would I let it all slip by like it didnt as if just idk its weird, like cos it was their like idk we used alot of thy stream cos of being open to flower of life, again just in general tho taking a stimulant, but yet we did it safe, never abused anything like its taken for granted here, all this shit, just your tryna bring me down here...

like idk I dont think it is random, I just have a sense we being played and we dont play.... like you get chopped off here and up like lumber here..... lol but yeah like idk imagine existing on this planet in general, and someone writing this much about it, and again show what they show, like just idk what else to do, you could use it in anything....... like that this happened to this person & this is what their thoughts be, like so idk, like just again ahaha I dont have a choice if nothing is free, but to use that against thee if true just be wrong, like it aint the way to success here, idk like just that all this again manifesting like this just says to me like that idk the truth dont change, what works for me, may not be ya cup of tea here, but it is mine, and its wrong in all ways that this happened...... we even took both pills like you aint fooling no1 if it be true here...... only wasting ya own time...... like just that is what experience told me here like if you have a thought about someone to say it atleast......... cos aint many ppl get on my list here.................. like it never makes me feel thrilled only sometimes...........cos just thats how much we know about our own history here within the matrix and being guided by things always, like it doesnt even make sense......... just like aint no1 invoke the creator as much as thee and again for everything, for writing, its all taken for granted, all we ever wanted like thoth says in the tablets to be a friend & share when thy other dont have any...... all my old friends be like that tho or with the meds, like just it is what again like its medicine, all this shit is beyond dumb af, just cos we have fun with it..... like whats happened here again just beyond evil and we cant be forgiving that ever tho bcos until you are put in this position and see how it feels will you or would you know here.........................

youd never find somebody like me this aware bcos legit years & years been put into what made me here........... like my whole life been this story here about adhd meds in a way, like cos, reality aint reality, to invoke some meds even like shit its all in thy mind and thats whats again you can live your life how you want, not everybody does feel the same, but again just idk like its the only answer =(that is what magic be tho, like its stupid, like I said its what its all about in runescape you grow herbs and make potions, drink em to gain powers, likeeeeeeeeeeee its so stupid to even think I be wrong, just need to let it be .... like their is no time for waiting , aint ever has been........... `

its like what the fk do we do like that is the only paradox, cos we got adhd like we follow energy. and that is dangerous, its hurt thee if nothing ever comes to be here................ like that just idk nothing is free and I aint feel good & you aint even got a heart here to be like I got you, like pft like how simple is it here, its so real like a cheat code in this game, like it is nature tho..... =(like just idk not even a friend will share, like to be going around life rn with all this here, like I aint know what to think just that again experience is gonna prove that your a douchebag by having no choice I wont be ya friend like how simple is that its cause & effect here................

if we be this curious we must be wise, like aint nobody hear me out here shits fucked, like I show the truth and nothing happens, I suffer more.............. like I aint know what to do with myself rn, ahahah like see, listening to chinx superlight atm, again all of it like officier what was my exs dad ahahaha like thats why it hit before just talking after I went back into things ahahah like im like hmm it works tho like got a reason to hit harder...... but hes like everytime you drink that black cloud gon follow, the dragon here lol, again alcohol is poison .... but yeah idk just a good song , we just again posted diff songs in our thing and yah i dont know how else to operate here, like that all this is not good for thy brain without any love coming back here and theirs none legit........................... hes like you get it too if you knew the same shit I knew..... lol like the truth here but yeah idk the thing is the song works at this moment in time and space ...... but yeah like just idk you cant beat me, so why do you think you can, why do you try, like cause its automatic and all we do is write................ like cause we share the truth at the same time....... what you dont do or how you cant see....... cause just again thats just who we is, like something better fucking change soon here like no jokes, this is beyond like something needs to be, cos if you way fucking worked, I wouldnt be feeling like shit rn....... and it dont work obv...... like need to trust thee entity here............ again just like idk its too chaotic rn in thy life and been since I lost my adhd meds like that is whats wrong, is you wanna hurt somebody else here, mentally, when how simple is it, like thats how the medicine works, to take it for years ya asshole, what am I stupid, no, we come with a fucking story and reason, and share the truth asshole legit like all you do is make someone not wanna be ya friend................

we are more likely tho cos of how we move, to watch music with videos is also thy perspective..... but yeah idk like its how we moved in the past and again just thats it, what more to making music is their but vibing to it also.... same difference...... but yeah idk like I said here tho this is the truth..... I aint like any rappers me & my ex listened too, I dropped every single song here ahahah and then idk like just chances again that is thy other truth and side to it still, if harry didnt exist as a name in consciousness here, we wouldnt of broke through at platform 9 3/4 here........ ahahhah is the way to put it tho but yeah idk like cos this makes more sense of why that wasnt, like all ik is love is like just again, someone who be attractive in all ways...... and this aint like it has nothing to do with anything but the matrix like that just you can only follow ya heart here........... just how light is yours...... like...... lol but yeah like just cos she existed and then with fetty we got him back cos we heard him at the mall im like lets go new association here tho and yah idk like just this is the thing about it all too, like when I messaged harry also like my ex messaged me thats years after we lived together..... so like nobody does know I guess.............. like that I cant forgive her ever or anybody like what dont others get I guess cos to me, that is what again being taken for granted here is......... like just love be automatic....... and this aint like its so one sided always here............................ like you dont even care about thy mind.... and our thoughts........... when its all somebody has................ says the entity lol like idk I just again like to put in perspective and have fun with it, bcos it is thy truth we experienced........... like an entity just spawns outside your door cast a spell on you and like goes into your body? well the tablets say that, we took adhd meds when it happen, again become mindful a good thing, all iv done here is been treated the opposite since, cause just either way assuming is bad..... what we have done is cut out the reason for any misunderstandings by doing this and nothing still is..... like just yeah idk just well if its not this it gotta be something better to me ahahah like if you get on my mind...... then yeah like idk their aint like idk its so random but nothing be........ like for all ik is again like I have no clue.....

its pretty fucked that again just this is thy truth and nothings changed........ like either way we have reason to question things, and again either way, to sit here & nothing to be in my favor..... the fact again you dont care about thy story, you wanna think you know more here, w.o atleast simply offering thy shrooms to change thee mind.... when again then what is magic...... like shit, it does depend who you do it with if you asked me here...... 1 person, even a friend can make a difference tho...... and just again but ya like see idk like its cos experience here but yah just its all the reason why we think like this....... again like just even if dont have the full story, we are spot on about what the truth is here, like idk ...... =(, like this again it doesnt even feel good, we aint happy 1 bit here.......... so how do you explain that...... like its the apitiamy or w.e that word is of what magic be....epidemy hahah like spell check idk think we turned off cos its mad annoying but or it works like you press the shortcut and it checks but we just write how we write and dont care....... cos its more real like the tablets how it is to hit the reader than just trying to be proper, this is proper to me here it flows......... like lol =(

like idk sometimes again like if I had adhd meds, be way more organized here and feeling okay......

but yeah like idk we could focus on what we know and try to show it, kinda what we tried to last book in that way...... no difference to thee books of osiris in this way........... but yeah idk like im so lazy rn............ just again nobody is a friend, like doesnt matter who you are in a sense, not even family like how fked is that tho like shit just the truth is too wild but again ppl just do it, I dont get it.... like to accept evil would be to not write.......... we write cos we know we are right........ and just yah idk like who does this like I said, but the person who experienced this........ like its how again just what am I suppose to do, really tho like

just the problem here from the getco is that again this wouldnt of manifested like it, if the truth wasnt concealed here, like you cant 1 up the truth..... cos not every1 is as curious as thee and again idc I just wanna do it like have a good day and this sucks, like it automatically comes with in a way like a sense of holy fuck like taking a roller coaster ride really it has waves do shrooms.......... and again its just kinda like why wouldnt the book of gates the glyphs on the wall be about hours and the journey in the netherworld, if it wasnt for shrooms being how you activate it also like its so simple, ... and prob is like just we did something right here and all that is, is wrong, cos right even if my life like shrooms dont automatically here mean that something good will come, but it means who uses the system right can , who is wise, like just dont know..... cos just idk the fked up part of how life works, is that everything that you think is good is backwards to what good actually is, like a truth so good in the game that it will like kill ya train of thoughts here......... like forever etched into the brain is thy shroom spores .... resislent to any other cure, cos it be so potent like wtf ...... its fucked like that something so heavenly, aint just legal, like pft like just we aint do nothing fun much at all on top of all this, being sent this way & just we are already old enough like we aint wanna be struggling through our life always would rather go out with the bang like the blackhole lol just again everything is backwards, like death, pft, to be alive is already like nothing suffers in that way like but this pft theirs answers....... like just again as if dieing, like it is just waking up in the entities dream & to put in perspective what has happened here without knowing the full story always like hmm it is possible but im still not listened to here 1 bit, and ya like we can go from like this is what we talking about to you could only understand thee if you knew like from naming something to not like we suppose to be pondering the same thing but thats why I write like that, we give it away and then leave it their, like as hmm but yeah we already said all this also and I dont know............... alls ik for me to express here this is what be & these are thy thoughts & not even like anything back, like an AI chatbot is more friendly then ye, like we are all bots anyways...... really tho its best way to express is cos its that knowing the truth, the truth cant be changed and thats the fked up part about experience & growing up in these day of age where again, aint no internet rarely aint no social media or youtubes or movies like aint nobody have internet on their phone to it just was...... the greatest paradox to be born into like I said before...chances....but its how we view life like this as again..... hermes states that like for praising thy creator, the maker of the game ahahah how cheesy but the truth =(

just mad funny like idk that scene I posted once on X, I had it on YT it was blocked in the US tho..... not in the UK ..... lol but fairy odd parents just saying like be ba birds ahahah and cosmo be out the window and he be like or infront of the mic, if I was fairy I could do this, ahahah and its like kinda like or he was flying out the window........ what happened to me and again chances that episode march 15th, again thy 1st gfs birthday, now how could this be like it manifested before just saying tho..... just idk we really liked her for the longest in my life just it was knowing the connection be again like shit but yeah idk lol....... just random af, ahahaha but its kinda like us here, like how I talk, is that, like we are entities believe it or not idk I have fun with it like I said...... but yeah just even to again the magic muffin be the shrooms, like you think im stupid here really like just idk , its how I know ppl may know, but it aint always mean its the full truth.... lol.... like but again idk just why would we know this is also the question, bcos what happen to us sent us this way ahahah like just all things, to relive memories mad fun, and now life sucks ass like not joking, pft if it was as easy as pressing a reset button here like that other 1st episode in this like shit we be out cha, like pce onto the next simulation.... like ...... but hes like again have it still on my channel but not on but like wish for a game thats challenging a game that you cant wish yourself out of.... like that is what reality be..... like its all illusions and we aint fooled ever, like shit this is a game, cant tell me how to move here.... but yeah need to make a living & that....... and yeah but just idk life is so diverse at the same time like I said, that is what having ADHD be like, like focus here then on this like cant control like where the agwanti pulls us here.... =(

like really .... I just again people believe this or that and thats all dont need to meet in person others, just wanna hear their opinions on this all is all like between anything, like I bet you, you didnt know this, chances, like to express it like so..... and yah the whole story makes sense but nothing is nothing changes, we be writing till we die and nothing will of changed..... like really here...... =(

the difference here to me is again you aint or werent enabled like I was here to bundle up the answers in little sayings and record them and then use them to show we are right... like you werent enabled here to show the truth, bcos you aint find the truth like we did here.... and idk how cool is that, to have someone share something, like pft shit is all a paradox, its basically like obviously at same time right without seeing evidence that this is what the truth is anyways but to see it, hmmm just idk like we saw the entity and as I said, he was a blackhole , vibrating black shadow.... no other words like it was super real .... like just again its different when it happens in the place you fall asleep at here which confirms this is real, it wasnt the dream world, but the duat ahahah wtf ...... seriously and its too fucking awesome for nothing to have ever been here like all I can do is flashback to it and remember like nah this happened and we gotta again like do something about it, but we try, we just again , like idk what is rn but we do share our thoughts & even this be taken for granted.............

like that we write no matter what, if somebody is or could be may be listening it is possible, like I said, but either way we know this how thoughts work again to begin with, like really here...... only a wise person who knew the truth like why does someone write if the creator didnt enable them too here.......... its again like just dont know, alls ik im taken advantage of when we share it all, like the process be like again I was down either way before the writing, just that a wise person knows, reality just is...... their aint nothing you can do about it tbh, but their is a belief you can change your thoughts again just when you know too much what do you do........ everything is a paradox.......................... this is what happens when this pathway leads yee and its super dangerous bcos like just again that can be magic too like just its the part where we just like idk we like our space....... like we dont just go after anyone .... like but ppl come after thee, like the tablets be speaking of the dweller chases thee and that can be anyone and everyone as the entity is in a way all that their is double headed illusion like ahahah its fked but life is like a game where yah like just idk =(not happy , super stressed..... tired.........

seriously like in thy last book we showed again the dragon on thy and in the clouds, like weve shared it before but its just that, it is real like whaaat would you do and for me to share it like shit just likeee its fucked to know the truth and this be.............................. like what aint nobody gotten closer here...... really a reason again was that why is like Hermes naked alot and it was a key to me like hmmm and his hair be like snakes again thats all their is........ like just idk for someone to know this and for this to be when this is their story about how they viewed it be mad wrong here i guess.......... like just cos like why would somebody who sees the truth write this other stuff if it aint the truth, like hmm Iv never done that to a woman... but it surely is and would show something ahahahha like iv thought of it in a way...... just to see but you can kinda see it anyways and its just again thats what be weird about being alive, like that just thats fucked like why woman and why men exist like opposites..... ahahah like it was made to go in their ahahaha js tho like hmm just again as if I said being without thy other make ye out of balance also................ but yeah just again but we are a man and that is what a man does more often is alchemy like its in thy nature more..... really in a way.......... =(

like idk the fucked up part of it all is being spot on , how like thoth says its an entity, why is their a thoth entity on my penis like thats all hes holding a portal in his left hand like what is on the tablets, only 1 reason, this is how he saw reality...... and just idk again the problem is it being the truth, and nobody caring to me, like pft but just yah idk like again even in the books osiris like it says we were chosen cause of that reason to expose it bcos man doesnt believeth like we do here................ like alls im saying again just idk what to do, bcos in other books it again talks about initiation right, theirs no turning back, like shit you cant do that without nature, like just idk bcos its the point of nature when you bond with others it can be which makes it like fun, without that what is man likeeee lol like but yeah idk these be my thoughts and im more direct here than on X .... but again it just makes sense, but it doesnt make sense why no1 cares like pft its super interesting that their is a design like it in the light.......... its like what more proof do ye need here...... like the boundaries to the game be the dragon always lol like just what kind of simulation do it be... idk like again just this all fucked, we even played like that shit the sims growing up like I showed in the pics.... ppl before my generation bcos of games didnt have this angle of reality is the problem or the solution also...... to why in thee childhood he learned of thee secrets..... which again it just is thy truth , either way .... im not happy and going to bed here soon......

like im expected here to just nothing to happen when I again go on and off meds, fuck with me at times, bipolar aint do good ever, zyprexa, look up the bad side effects or what ppl say on reddit, we have before, but again ADHD, different story, helped me, now I cant think, how evil is that tho like js... but for all this be and again like the truth to prevail and nothing to be, is whats more fked like I aint know what else to do or say or believe in being here like but we do know life can change........ and it aint shit been the same forever......... like no1 should ever suffer this much, cos we suffer knowing thy truth =(like the gita says again master of sacrifices, and they do not know me in reality and hence they fall............ back to the mortal world while our mind stays in heaven, like its so heavenly we know just again its all an illusion anyways.... sounds dumb, or obvious but we just dont care cos of whats been, its fked like im never comfy here ever................. never cos of esp the meds did help in one way but in side effect ways no not at all, made the situation worse. but the right med would help and this sucks............. like again just you aint know what other ppls intentions be and thats like adding onto the evil here, cos it aint always all love here, ppl be corrupt and dont even know it, cos the truth is so and just is, like if everybody had thee mind, but yeah its all a game, like everything that is and will ever be, is already.... is thy paradox of the future........ like cos its what experience showed thee with and cos of my X's .... =(like really tho bcos of experience I aint have any other way to view this and that sucks =(

I mean really we have all our few types of meds here but ADHD, depression doesnt do shit instantly we have that cos we never liked it was gonna toss it..... zyprexa or seroquel does..... but again zyprexa be dangerous esp without adhd meds...... but the low dose seroquel 50mg idk we got like 50 of em..... I just took one again tonight, rn its 115am..... like usually I used to take it around like 9pm at work but yeah idk its light but it doesnt cause them bad side effects like it helps thee sleep and iv been so mad lately, I took melatonin too actually, cause thee brain is so stressed between all things, even talking to somebody, I cant trust em like cos this happen if they dont listen to reason here....... but yea idk like cos again just the truth be that and with all this happening actually willing to take bipolar only bcos of all that was again, like just its all in thy mind and thats what nobody cares about here, like we need some relief here and doing anything after this all being like its beyond fked but the right person would listen but they dont.............. and yeah like really tho 50mg seroquel is really light it said before its as if 1.25mg zyprexa and we used to do 2.5mg zyprexa...until last yr when they fked me again its beyond evil actually theyd just kill someone giving them these meds and you wouldnt blink an eye is why we write, like you dont know, likeeeee just we need something here, and this is again 50mg seroquel is like really light.......... we are always like not feeling good here...... like really if you had any fucking clue here, you would help and you dont...... the paradox be so simple cos the entity shows the answer tho................... =(

or we have like so we got rn like a few zyprexa 10mgs, again never and I aint like chopping em they never as even in a way but could, but 50 - 50mgs seroquells and some that hydroxine which aint do shit makes ya tired, we just took bipolar for alot and it never helped, but with adhd it is a different story.......... like we took adhd alone before all this is what is fucked up about this, like again a huge part of how the brain works is dopamine to begin with how dumb do you think we are, like we could never sit here without giving our reasons to why this is beyond fucked up here like why theirs no reason , theirs reason to take adhd meds and im beyond upset

thing is this happened before and noone listened, but yah it is the reason why we have switched before from zyprexa to seroquel cos it aint ever helped like adhd does tho like nobody writes this much that doesnt have a mind that ponders I will tell you that like you want me to suffer here and thats mad evil

but yeah like idk seroquel again its shorter acting also, wake up less groggy, but yeah like cos zyprexa again causes issues with all things your blood and it all........ like the fact we come outta this and again no fucking relief ever here, like just idk we are completly within reason here is the thing .... like we be right and aint no1 wanna be a friend..................... just in anyway , love weed like im so mad rn.................................. it could be heavenly and your evil af.......just for every and any reason here, cos something else could just be and it aint ever, like we aint no fun, when we do tho like wouldnt be ancientxthoth if we didnt know how to vibe and you be lame to me and everyone

just I really dont know, to have these experiences & see this angle, anyone with any common sense would be like hmm this be deep tho.... and again aint nothing ever is, no relief, no idea what to think about cos what iv thought about aint ever been here like we aint know when we do like that we barely do talk like the voice be active here dont need to talk life just is and just decoding it , and having it be thy experience, again how much more of a test can you give given here, like we got ourselfs we came with thy wisdom again just nothing tops it like I dont get it............. but I do, like shit just wrong like when you could stop someones nightmares here you just let them continue having them as a saying here, like that means you aint a friend at all here...... like we aint have all this wisdom cos medicine aint the answer, its something again made life worth it, now nothing is........... like just you cant outrun from the truth here or the entity forever here, he is fast, and will get ya...... cast a spell on you........ eyecastaspell, again its all cos of this.... like its what happen and again pft just we can be friendly to anyone, but if ye cross that line, then its not my fault if you get bit by the agwanti here, nothing be free here so watch how you move I guess like thats all, cos shit this shouldnt be rn and it is for the wrong reason, pft who knows the truth and says that, if it wasnt the truth...... like its so dumb, life could be fun....... cos we already again just went through this process which worked and this doesnt rn like every reason is beyond dumb, like just aint nobody like thee this is our only chance at ever something being also like really its the only way to view it tho............................ like we come with thy paradoxes cos its meant to be in thee mind ahahah we add thee and thy alot lately cause..........

like what more loving thing could ye want to be, like this is what they are selling and this is what we be writing.... you cant top thee effort & dedication here like to think, this person knows this....... pft shit we stay casting spells but bcos its been done to us cos of the entity what else can I say tho like but yeah like Idk cos just in that way again we prove a point here...... like you cant find another me, thats the pt, I mean cos of it all, we gotta be irrestistable to others also, like cos everyone sees everything differently lol...... but yeah like just I dont know anymore...... but just idk..... this is the best paradox you coulda been offered here or anyone to see.... cos their is a limit to being a human is the paradox...... says thy entity inside of thee ahaha really like just idk noone again goes as hard as we do on this truth , believing it cos it be real...... =(so we write and idk just life could be fun.................. =(

this paradox be so fucked we cant get over it & again just idk like really dont know what else to think atm .... =(its like 150am im mad tired.........hate my life, like all cos meds help that is half the paradox and both parts of life sucks ass, nothing gone right at all here, like really their is no pt of even being here in all honesty, like its fked to think this is thee mind and gotta take it here to express it like just yah idk what to think................. cos either way its been all this energy since this happen collected like my mind goes insane tbh...... really it aint comfy its stressful and thats wrong, why medicine changes all things....... like =(its honestly just like it aint nothing but corruption and thats wrong like shit all this be so dumb, like life has never sucked worse all we wanna do is sleep and not be here really tho like we dont do anythinggggggggg like we dont enjoy ourselfs everrrrrrrrrrrrrrr like w.e tried to warn ya before......... =(

9:11am

Regardless like im so mad legit like my day off here wake up to a call from thy work, pft My day off here like nah I aint wanna go in today like legit wtf we need time here to recoop, like Iv always gone in, like im so tired rn, ppl like im so angry

I aint feel good at all here and im not like I have no idea what to do about life rn like that aint nobody care about thee story or how I feel here like pft just like what would you do if you never felt good here..........

like that nobody cares when you do be burnt out, they look at you like a slave, like legit today is my day off to prepare for thy week, like it aint my fault if ppl call out here, like cant be their everytime this happens, just like iv had enough here of all of everything like I said we did take seroquel last night, like im so angry im about to go back to sleep cos im so tired, my mind be stuck in these mental loops and aint no1 give a fk........why do you think im so upset in totality here................................ like

like what is not understood here about anything, like the fact we aint have any dopamine to do anything, like hello that is what ADHD paralysis do be here tho , like just the act here of calling out if I had too right or calling back like shit I aint feel good about anything like if I had my meds no problem aint no obstacles here, but everything be one atm................... like just again why we write, cos it be this paradox which again, like nobody knows thy struggle here..........

legit it be 1130am we been sleeping again took melatonin and seroquel like dont be calling me here on my day off ya asswipe, dont call out here and expect me to have to call back like pft im super pissed, like got shit here to do and to relax, like legit aint feel good at all here in anyway

I mean dont you get it in totality, like having ADHD be like this, like its why iv lost my job before bcos I aint wanna talk to others, like I have no motivation in life bcos of what happened to me here in 2018........ like I really do not give a fk or care........ like do more what to get more burntout and for it to not pay off here like life is such a joke here tho

its just again just it do be the truth, no one wants to accept here.... like how would you feel if this happened to you & this is what youve expressed here if this was your own thought paradox, like we tried.... ppl again wanna think like imma monster, nah we write we got reasons here

like just that isnt not calling back an answer here, like im not calling thee store cos someone else decided oh I dont wanna work today js, like we dont do video chats, we barely take selfie pics, like again we arnt like others here, like shit shoot me a text, thats a different story like we would respond, but having to call cos someone else, like gtfo this be my day off to relax here and its just again apart of having ADHD to begin with...... being stuck in ADHD paralysis be like this....

but yeah like between it all you see, weve just walked out of my jobs in the past bcos like that is what having ADHD be, like in a way of like just again their is nothing to talk about here if I dont feel good, I cant express thy thoughts to anyone, nobody would grasp oh like but this be our story here....... and why everything is wrong, like you let them poison the one who had love here..... you aint even give thee a chance here , whats cooler than talking to an AI chat bot but talking to another human being here, same thing if we are all bots tho.... aint a difference..........

like everything is a joke here.... nothing does matter, like nothing here be true...... like again you can put it in all the work you want like I have pre2018 , doesnt matter, like thats all I am saying here, this is what experience showed thee, its no way to live life here................ like just again all this be on thy thoughts and I aint know what to do.................. like we really do not, and feel lost & feel no love at all here.... when all did was try to show ours, tell our side of the story here

ADHD Paralysis

I feel like again idk I wanna take these writings and again like talk more about what ADHD paralysis be , but its so hard to be organized and stay on task atm, like but again what happened to thee in 2018, paralyzed, again idk weve heard it all in music right like nothing makes sense here, all we do is get hurt from showing our love.... again doesnt have to be this Ariana thing, but nothing else makes sense, like if true im being played and thats evil, theirs no reason, and their is nothing else to believe in........... it makes the most sense to thee bcos of all these reasons weve wrote about, like idk , why would you play someone who got love, maybe im totally wrong, but thee reasons back me up here like right what if you were in my shoes here and had these experiences, wouldnt you be like hmmm something funky be going on here, like this person saw the entity and it makes sense......................

or just even talk about it all in a more direct fashion, like that we talk about ADHD or this/that but we too lazy to name chapters after things their is so many things not talked about here..... again like ya we hit money man at times & that new album like right, wrote all about it on X, nothing hits the same when your in this situation but we like a few songs, like serving myself or we not lazy..... like good songs, he got many like but yeah again that friend I talked about at work , the paradox is following thee heart, and hes the one who had heart surgery like a month ago you see.... like I dont know how else to express it, its just someone I worked with but this is how it manifested to thee, like giving others answers in this way of it is possible tho............... like just as in being a friend without being a friend, cos it brings corruption as if, the way we move doesnt........ like cos nobody knows of thy story here..................

like that their are many things not said here, bcos like just between it all, you try taking the meds and then you tell me, your not complaining, like shit its all dumb af and nothing is, we openly shared our mind and get pushed down here , its alot, but their be reasons, aint nobody like us here and its taken for granted

Music

bcos just Iv said it on X, this is how money man manifested to us in 2018, like again we bought edibles my dads friend id give him money & hed talk to the person who had edibles and got em on the job, felt amazing, like bcos he says that, im not a plumber but I lay the pipe, like in secret society, but yeah its why and how this manifested with the artist money man tho, aha we aint again keep up with every song but some hit at times....... and yeah like just saying he was around when the entity was also, many artists was, cos we took our medicines adhd and like music sounded good, like that is where all this energy actually derives from here tho, like all of em, was more open to listen, like lil baby, again same paradox here, like as if other ppl on thy job listening to it and they all mention it adhd meds... the tablets paradox........... like bcos when thy ex left tho we had more time with our own thoughts..... many artists come from this period here and its also when we went down the rabbit hole.....

Rabbit Holes

but even again to that 11.22.63 shit, that netflix movie that came out on other platforms in 2013 or someshit awhile ago dont care to look it up but we mention it all, bcos, like we worked at a diner.... like that JFK welcome to was by chinx cos of thee ex the associations part..... or even in it, he drinks them ensure drinks which they gave me at mental place....... like theirs a chapter in my other book called.... J-ust F-ucking K-idding, just again we have fun with it, but we watched that, like again just life aint always good here....... and I have no idea what to think...... at all here in totalility, cos music to me sounds like the answer to thee life like its why we were generated in the matrix.................... but yah like this movie or series came into thee life about when I started my job again right after I went through all this, med change, but the problem is if the shrooms were offered, like that is what heavenly be...........like we got the answers, nobody wanna believe or even be a friend on this planet at end of day................

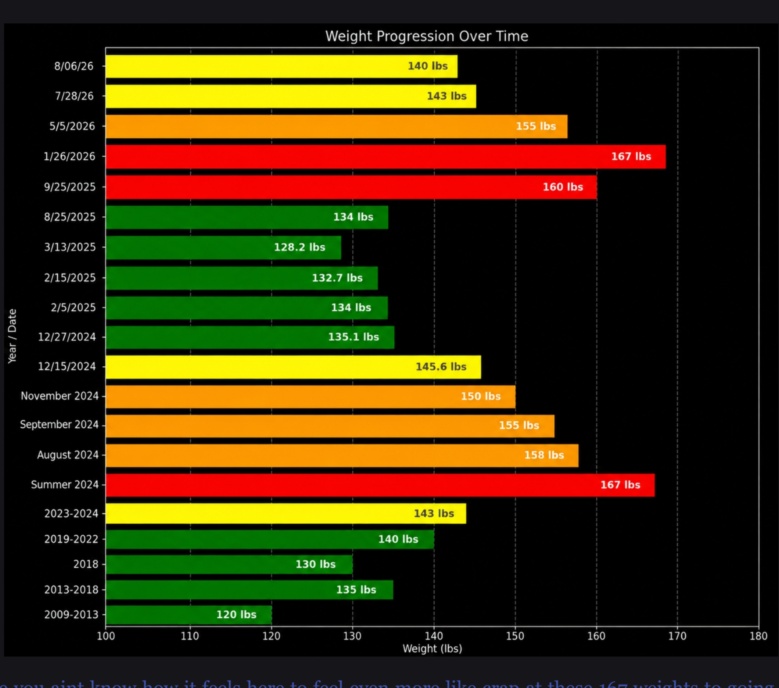
like this is the totality of thee rabbit hole, even on macs best day ever right, like all of it, the matrix..... and im not given an leeway at all here, like we are not belived, not listened too, like what would you do.. we try to express it........... not given any credit here at all, its dumb to think like oh it has to be then, nothing has to be here is the truth, but we were open to it.................. like we know the game here & we gonna play the game........ lol thats what im saying about this all in totality, who knows, but we do.......... again but just if it aint, it gotta be something better then here to me thats all.... its gotta take me in the same way of being music be the answer......... so its just thee paradox atm

Randomness

It already noon here like legit just woke up at 1130 here but yah idk we might release one of these like weekly until something changes to say like we tried to get our word out here, just wanna again talk more about the problems and why we continue to writing this, it truly is alot of writing, but they say we men dont express ourselfs enough here in a way like we write, we come with reasons here....... solve thy paradox says thoth.......

just idk in all of reality, every thing do be wrong here..... like between it all, you know how easy it is to raise somebody in thy light here....... always the opposite is done here, like 1st of all to have somebody down like this, the light aint in everybody tho but yeah idk we gotta do a few things today again like gotta get ready for the week like pft like just that you think im kidding here, I aint know wtf imma do here why we took seroquel again like I dont fucking feel good here................

but yeah we aint take pics often here, but again like just its more than again thy weight chart here... then add bipolar or life opportunity into this picture and that is why the trend be like this.... very simple math



that like you aint know how it feels here to feel even more like crap at these 167 weights to going back down, like we were not happy 1 bit with how those medicines at an increased dose here 10mg zyprexa did this to us here...... like legit we always been skinny here................ like to lose it all again...... its just the truth of it all here...

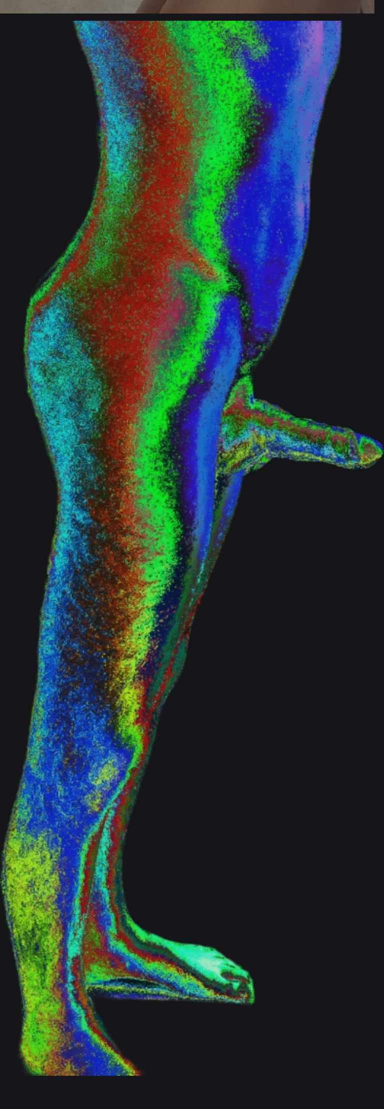
like but it is the feeling like shit before & gaining weight which again we started titrating our meds like months & months ago, this has been going on forever, mainly again zyprexa does it 5x more than seroquel, seroquel doesnt do that to me esp at a lower dose, like again they will hand out like candy these meds and its mad wrong....

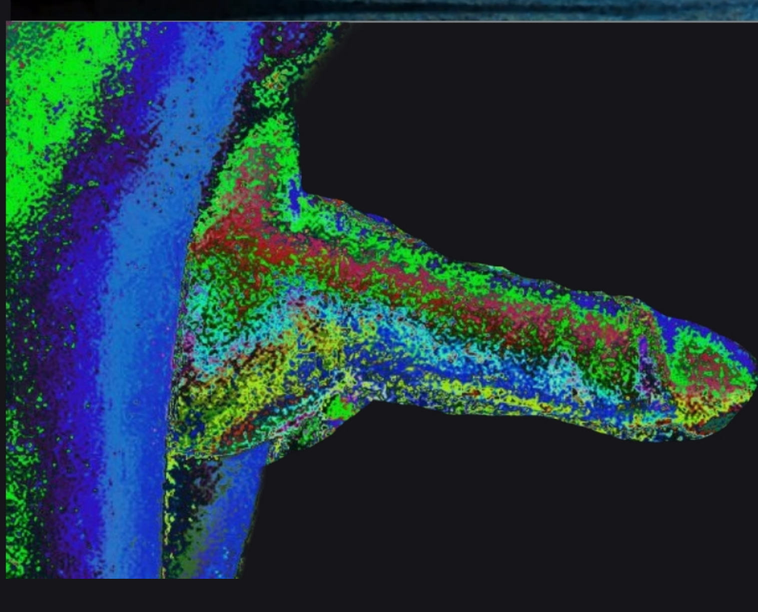
but yeah like its the again we had a gut cos of it, and its seeing it again which told me like these meds arnt the answer .... people are blindly evil here tho..... bcos just again like this picture, this is when we felt the best tho

haha mad random but yea like just we do like not let hair grow on thy body..... ahaha shit cos that be like weird af and gross, cos if I didnt shit be like that lol........... just again the fact is we aint ever let our facial hair either grow out, like we just stay clean like hermes would of , cos of thy slick speed.... lol but yeah just idk everybody be different...

but yeah even between it all below, like that theirs a pyramid, at the tip..... chances.................... but it is real and super cool, like natural tattoos here of the creator, is what it be.....

their is no greater of a paradox than this being tho tbh like i dont get it , but i do?.....





We just write as we go along here, some memories, all of it, like dont know how else to do this.... but we gotta go to the store, like just doing that, a task in thy mind, without meds, without ADHD meds, I am useless........ but then ya hit up the vape store again can get better thc online.... may do that, but its all getting banned soon in november or something I aint sure tbh but yeah like everything be wrong, back in MA just hit up the dispensary, back when I had a good job I loved, now I lived here, like I cant take being here for real, that their isnt another reason and again we were more than truthful all you wanna do is push me down here when this shouldnt of been in the 1st place, just cos I went my own way and followed my heart here.....

theirs a truth to bonding with thy soul and how this manifested even last year here, like again we give the answers, im not listened to at all, one bit, like im played with here and that be wrong, all you had to or have to do is by thy friend...........

Thy Paradox Continues...

so we just got back from our errands, like pft legit we aint ever call back my work tho like me not answering aint that an answer enough like I said we aint playing games here, like today is my day to reset for the week.... like pft

but this is what happened.........

again so we go to the vape store, I pass like 10 vape stores on the way to the one I like, its like 30 mins away, but I found this vape shop fuego cos they had the and were a certified dealer of puffco so like last yr its when we went their 1st, bcos they have the vape flavors, they have the coils, unlike some places around here like theirs way closer ones but we remain loyal

but I walk into vape shop.... guess whose playing on the speakers..... smashing pumpkins ..... we mention that alot recently

& yeah idk we got a few gummies not a bunch cos I might do an online order for a vape or something, was kinda thinking of stocking up before it goes illegal, but im not sure, I hate the time it takes to refill my own pods but I liked their thc8 and their terps they used but not sure , we can get legit thca online in vapes also.... but one is cheaper like I aint sure what to do........

then we go to walmart, like you aint know how much I hate working where I do, like ppl make grocery shopping like when I go again aint wanna talk to ppl thats a rule where I work like gotta talk to others, like to the people who smell like shit, pft how hard is it to use deodorant or some colonge here shit be disgusting ......

but so right like you know them sugar cookies that pillsbury sells.... near the holidays with the images that come precut you just cook em, like we got Harry Potter ones ahahahah =(just cos their was love here and im not happy but like yeah kinda just buy it for the energy meaning tho

but yeah like then at walmart, again songs in my library come on, like where is the love song..... their was another one but walmart always plays way better music, like the shit I deal with at this job, it is misery it self, like that aint no 1 been through what we have here........

but yeah then again its like this, like I said, its not a joke, we shed emotions alot and listening to music while driving, like shit just cos of life like it got me teary always like just cos life sucks so much & their is no relief, I aint know what direction to go in when Iv stated thee truth here , seriously I mean since bipolar meds, I have never cried more in a sense since 2018.... like no jokes, music can do that shit.... but we are open bout what is and nothing ever is.... =(

just cause to me, its sad for this to happen to me and for noone to care and people are against thy when we are so wise we kill ya with the truth, cause thats how love be like our love kills ye with the truth, you think again everything suffers at end of day, its the name of the game here, corruption........ but that is all rn like I dont know what to think here =(

same with like the febreeze or ariana bag in my store, at same time..... Harry potter shit always be their and again what a fucking paradox here honest to god cos of these associations, just really an event, what if life like again what if we didnt take this pathway but we did

ohhh that was the other song at walmart..... it plays at my store too sometimes.... music at my store sucks asshole..... but it was I think right this paradox again cos thats what like I swear my cousin mentioned back in 2017 on X or something right like fleetwood mac, that linger song, I swear its them I have no idea its not something imma put on in my own headphones.... but its all that paradox....... even back then like just I dont know what to think............ =(

hmm just want some relief here honestly like my mind is fucking fucked and twisted.... like its what you dont see I guess, thought be most hidden which is why we write in a sense............ dont know what to do with myself, like its like nobody truly understands thee and the consequences here of this truth and that is hurtful....

chances, the day again I aint rock this spiderman outfit in a min but its all we got, like we aint got money for anything is the truth and we worked hard, all this be dumb af, like just its how I like to dress tho, like to have some form of like this works, this doesnt rn like pft.... everything just be corrupting here..........

like that even through this all right, like we know what we like to eat.... we aint eaqt anything we like here at all rarely.... cos it cost money, money we aint got here rn...... but yeah like just again everything sucks.... loved where I lived again imma say it again tho, going to the local farm to get milk, like cowed.... im so mad it was the best..... it was always apart of thy life growing up ..... to get milk fresh from the cows their ahaha =(really like we miss that banana milk tho like we got nesquick banana powder it aint the same .... but yeah just life sucks so much, they even sold like that famous pizza from the beach at this place, they dont sell that pizza here, it was bomb.... pissed lol =(like it be the small things in all of this tho...... yeah its like tho we aint we do but way less, like I enjoyed the other milk so much more.... their aint nothing special about store milk, its trash compared.....

just never felt more out of place here since again, why you think we continue to take zyprexa, why you think when they always wanted to change my meds, we stuck with zyprexa...... bcos just experimenting with things can be dangerous, everytime I go those places, oh wanna change the meds, last time I said again Id rather stick with zyprexa, now why, bcos all things, like did you have a seizure before just you never know what meds can do I guess.... and that is thy paradox of it all........ like really im going insane, like thinking bout keep taking seroquel again and that means again I need to see a psych dr, again its alll too much for thy adhd brain to begin with here =(

theirs just nothing else to say a real friend would help thee out by being a friend, a real friend would see thy paradoxs even w.o expressing it all and help thee feel better, not be poisoned here............................. and thats all, like I honest to god like dont know what to do bcos nobody understands the consequences here of the truth being what I have expressed, than what they have tried to sell me..... like as a human being on the planet here, shrooms is medicine, thc is medicine, the world be so corrupt its legit again hurtful and who can you blame but the leader at end of day.... they have all the power like thoth here to set things right and they do not, they do not care about you, they are not for all here......... and that is the truth of it all here ....

when again how wise may someone be to write this when this happened, when these are the paradoxes, every single last thing here instead of being appreciatied has been taken advantage of thy..... like imagine changing someones life here by being nice and thats all that is at the end of the day, like we found the truth, lived the truth, and nobody cares.... it is more than hurtful here.................... =(

Mood

just really to this paradox here.... looking online tho at thc..... aint sure like this site I wanna get from oh gotta venmo the money now like pft I trust it but I aint ever use it, and it sucks not being able to the dispensary, I mentioned this before, like when they finally opened in my hometown, we went legit but this song was playing and its how I found it at the dispensary, 24kgoldn mood remix...... chances like cos it sounded chill lol... and like again love weed im so mad rn honest to god here

lol just dont know what direction to go in here like its so easy to be a friend and this all aint, like you watch someone put more toxic things into their body than to help them .... like in a way, dispensary shit always be safer...... tested.... done by ppl like again I aint know what to do in life and that makes me again super depressed like we down so bad like shit is fucked , cos its knowing thee truth of what happened.... like pft I was sent into fight or flight and lost my job when I recorded it, when the mechanical contractor was amenti like thats what I mean, we know the game here & we gonna play it, like you cant fool me, and then its just that, why you against someone like my old boss who put in work, like if life never opened up to something better, you see how this life path would again it would change your mind too, like I always said didnt ask for it, didnt ever wanna be here saying it that maybe I am right & IK im right, not gonna argue with anybody...... like that just being with my ex sent me into a crazier state of mind when this went down, yet all we did was show love and again its too fucked up, pft like to go that far with someone and to not, like it aint love........ like w.e just facts here tho....................................

cos I said that paradox regardless my friend Brett who again like if you knew thee story just the story of this person in my life, like he paralyzed his gf in a crash, I even donated money cos my parents told me too like but that both his parents died..... how my cousins moved into his old house , like they both died of the same cancer within a year..... and how like bretts dad was a teacher..... again these paradoxes got me fked up, aha he looks like Beiber in a weird way of faces right like this all happen I told him this before, but that stupid ass song, I aint like it all, just want my own chance here, like his song, you should go & love yourself if you love the way you look, might be real like songs, but our vibe is way cooler and just that yah even in that AG im a beast song, like I swear its beibers song who plays at the intro.... like look at this dude, then AG be like imma beast here and AG is here initials. so w.e like im just being honest cos I think my friend Andy had some input but we also took the red pill, like what is the matrix here.......... again you think im joking...... shit be real here .... lol like its cheesy ass songs like that which make me hate my job, its all soft, targeted for older audience, shit I hate living here in all ways..... ever time I go into walmart the music be better, but even shopping at walmart, like its closest, publix legit be expensive..... theirs a huge one again never went in right next to my work its why its been slower, like rich homie says in the author.... like you see my pov, like he got songs titled...... think about it.... you see.... a paradox.... who is ancientxthoth here, but in a way he kinda got that same face. like the sloth face thats what they said and what you dont get about it but everyone views everything differently..... but in texas...... again just a memory, only times iv been their and I loved the atmosphere of like going places but I was a kid & yah like just and I watched a video on like the ppl who own walmart, forget think it was that peter santenllo person or like I aint got many traveler bloggers but the ones I do be yt famous in that way......... but yeah idk just saying like we just use the stream here...................... but iv never listened to beiber ahaha like shit just the paradoxes be real in it, consciousness be diverse, from working at a store to heairng this soft song, to going the dispensary hearing mood like shit be a different vibe......... and if you had any idea of how to think youd see I am right, like imagine living somewhere weed aint legal, like jobs test for a plant that helps people, it is worth dieing over like no lies here...... death again just it aint the end and to be this be thy paradox, like taken for granted here, same year it happened, again the words of rich homie ahahah like just idk to me, even if he did, he never sold out or sold his soul like in never fold, their are a few hits tho...... but yeah nobody can sell their soul, you just are you to me here....... like all that is wack, we dont talk, we dont have conspiracys but reason...........

hahah it just is like this hidden thing here where as if, bcos when I got my car like that person again you aint know the matrix, but cos like I rapped with that person quan tho like that is thy reason, like someone who tells you regardless bes real and you believe in yourself , like thats what a friend does, not this tho ..... but yeah it did happen so what do I say honest to god like chances, like its just again the reason why we double think things, like what is thy chances..... just the experiences dont lie.... =(

all of it, that album again we heard rich homie when he came up is the truth to it so it hits different, but yeah like rich as in spirit is what is was I swear like I went over this before.... he had a song or he said it in type of way I think it was then he made this album..... but yeah in deep you see.... or all of it most of it ahaha show em different then what they had showed me.... as in again like the dragon and all that , sharing wisdom.... being a friend, you aint................

one of the best albums like regardless.... again its that paradox even where just how like idk we spent so much time on music here....... and cos in deep even right like, who had a kid with the woman I liked you see...... cos I think everyone knew she liked me vice versa but cos of my 1st gf and matrix this all was like ..... lol =(

& what is it all but sacrifices.... not having it... which again just why or how this is like we wise and treated as it aint real like .... lol its what again we dodge the most here in a way, cant help it, things have magnetic forces is what experience showed me, like if it is, it is, like so how you playing thy game of life right aha like just I never heard again macs shit that wasnt happy looking, his younger days, way different..... its again just aint many do it, but it also set in motion thy mindset like just idk the rap game or music game in general.... like you can set the mood and you lame lol......

I just like again music be like that, pick & choose here I guess............... different tho which is why again the rap game was so much more fire before here regardless of what life is....... like their no lil waynes coming up in todays world..... lol

just again perfect paradoxes, like theirs answers but we dont have to come to these realizations here, life could be chill & you can search thy mind if you just meditate or use nature right like going inside, telling ya, the whole world is wrong and evil like thats what it is tho like and just the fact not even a friend realizes this.... like pft you legit live once here , only way you can view it, even if its all an illusion....... like you cant control whose attractive to you...... like just pft like in a relationship you like surrender to thee other ahahaha like really and it aint all fun & games when shit dont work out here..... but its all taken for granted here........ we lose out on potential letting these be..... why I said things can change in anyway tho so how are you playing again I guess......... cant be suffering forever and then think like imma just be nice or show love to someone here, when you coulda just helped tho its the simplest paradox that could exist........ cos aint nobody got thee mind & ofc we are gonna use it to our advantage...... everyman for themselfs out here ahahah in foot soldier idk like I said just hmmmm perfect paradoxes to why this is theirs always a parallel................................

everytime I hear blood now I think of this and what I saw like fuck you I bet its all again like we aint lie here with what we think is possible, but the last person you are gonna play in these moments is me.... like it aint a joke , ahahhaha its fucked cos again told you we aint follow anyone like it happened thy eye and I just again like its what they want in my mind, I could be completly wrong, but we ride thy wave when it comes .... tropical shit..... lol like really we again life could be way different here........................ just idk like cos thy paradoxes like going this way showing the parallels like just again how harry existed, her name, what if this didnt, like we never venture far or did again lol........ like really not everyone does it to thee but it can be, like idk what to say..... cos just what I have seen, in totality, like it says this but again like just its beyond like we broke the matrix ourselfs on our own here also, didnt have to take both pills... didnt have to do anything, nothing I do is recognized is prob the truth but theirs again the simple paradox to it all and why this happen..............

if I was any person on the other side here, id be entertaining this and experimenting but I wouldnt let them continue suffering cos thy paradox again it aint funny here. no forgiveness it aint just handed out here you aint recognize thy heavenly mind & thy bonus genius & like I said, you are lame af, like I said, could have fun here in a way, like what better way is their to make someone happy, like we just a dog at end of day here, we just wanna be happy, we loyal, like ..... lol the sphinx, but yeah we do want a cat at one pt in our life, like nothing I want is im pissed...... lol.......... like that again doesnt have to be this or that but it gotta be something here..... like for all this is thy reasons we are rich in spirit..............

Until It Sleeps

hahah idk our music library in a way what we have to work with here, be legendary.... legit like again just it doesnt always hit here, but I pop open media monkey bam like I remember jamming to this song for hours ahahha, until it sleeps by metallica........ again heard it before that new stranger things season 5 like hes again facing the demon, we had a YT video on it but yeah idk just saying like cos hes wrapped up also......... lol

I again every move we make got a reason, we look at and weigh words of the title maybe in the song, but their be a reason like cos this song got me feeling like again I aint know what the fuck to do or feel like here ahahaha ...... songs bout the entity we jam too is the truth ahahahah like why you choosen meee ahahahah =(

Tis but a scratch

just that old like monty python vibe to it the music video ahahaha...... tis but a scratch =(, the fucked up part is all I mention this before that kid keith I work with back doing hvac controls, like he said that line, his kid got a scratch or something and the meme was that like tis but a scratch, how would he know of that shit, like we know of it cos runescape ahaha =(

the fucked up part is like just what my eyes seen on war here like thats the meme I said to it like you can watch it like people shooting eachothers brains out and hahaah like they act like this again why is blood their like..... lol like just saying it always parallels I aint mean to go this way but it took me here

Whats so great about Music

thats what so great about a song to me, like just a one time random thing put into a magical spell format, like it might of took this person a week to enter an album into the matrix of music and then its forever their, like you can replay it, thats what music does to thee brain, like perfect time to be in existence in this way right like computers...... lol but yeah thats the thing about it is what or how I think again just why not be in the game why we watching so we dont like reason we dont watch sports or follow anything here.... lol

gotta use what works tho, and ya like I said, we didnt ever have to do these things but we did cos of the reason, like as if, again beyond it all theirs always a design..... for what life is to be or is ... like just the way we play here, you aint wanna be against thee lol......... thats what the entity says

the problem with it all

is that like again the wisdom always existed in a way but with computers again, just the way it works here, is by using nature.... chance of death means chance for transformation.......... like that is the only way to the truth that our ancient ancestors knew again what the diary says, and what they did was the good actually like its ass backwards here for no reason............. everything can be fixed, but this aint the way I guess

like that the problem with it all is knowing how it can work, and its not being done, like its ass backwards here....... but its what made me who I am at end of day like can only follow thee heart, can go what plane I want of thoughts here like............ so thats all I guess..... like you cant pull the truth outta the truth here....... like when it already is recognized bcos this already happened.........

just again like setting the ship in motion here..... is the same thing its hathors temple right goddess of love, cows, like is by activating the shrooms again ..... and having meds.... like adhd .... and having an opportunity lol like that their boats have shrooms on em..... as we showed before... the tips of the ships..... cos thoth says that, cowed I at them my display of sex magic, like ya believe what you want, that is just the creator saying cowed at them bcos of how powerful I am to creation itself like all knowing lol....................... like that we do be right and w.e life sucks ass rn is the truth, we so stressed shit aint funny

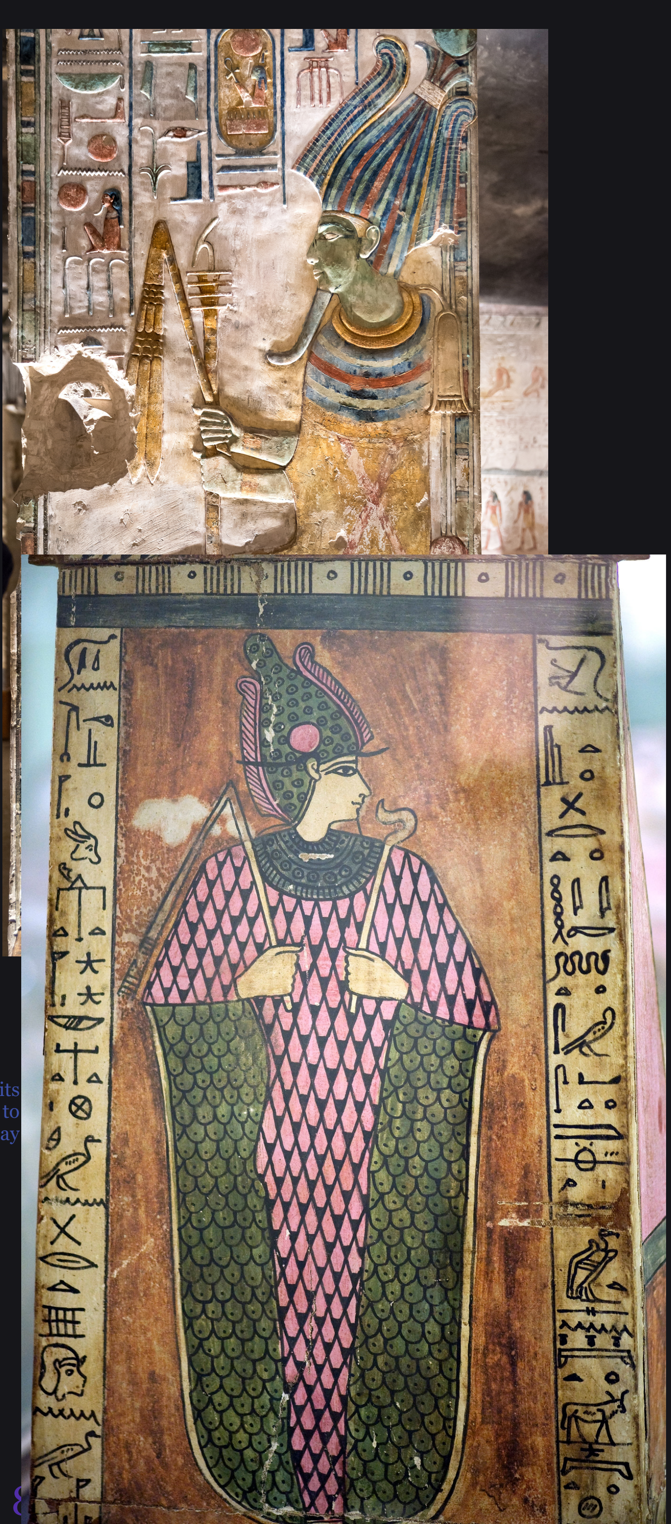
2012

thats us like we ate the flower of life like 2012 like I said, more coincendental is mckenna on that again timewave zero w.e he talked about 2012 being it tho and yah like again just idk like 2012 was the greatest internet trend forever like aint nothing been the same, covid all this shit, like thats thy name you see the paradoxes of it all like shit makes sense but it dont at all........ bcos really what the egyptians belived is again the power of spoken words, all of reality is mad evil like and we be suffering is the reason, like.................. thats why again the paradoxs exist and we always played fair here, we aint ever choose someone else over us in this way of loving ourselfs....... but shits been so w.e dont know what else to say here....

but thoth be the writer at end of day, I showed you what happened to me here and what my life been so w.e like it coulda all been without this too cos love just is..... but again like the last thing someone is gonna do is try to redirect my sails here on thy ship in life..... like thats the pt of being alive like life could be chill im pissed off tbh like cos we aint deserve it, we know the truth here....... regardless something should be then life be alright again but all this suffering doesnt do shit tto manifest any trust......... we just again retelling this all how we gain our perspectives.... what thy matrix shows thee .... =(

the voice

just sometimes we write in this format of just making chapter titles to tell thy story..... but yah we mentioned it above or something like the voice of osiris, lil durk all that shit........... like the voice of Osiris be real tho like lol.......... like thats the only reason anyone even makes music in the 1st place in a weird way...... its the only way to express that.......



I just the things iv seen here...

hahah just the colors here tho like the real codeine crazy ahahah just the fact its apart of my experience, like can I not have fun here, but yeah its a good way to view it I guess, like just again what it all means is that it can still be done this day like the Egyptian parallel always exists, a truth that cannot be altered.... lol =(

lets see if I can find this other one like again I expressed it on X here, how like we or thoth gains the key by bowing to the master of the underworld basically he says I recieved the key of life right and them enchanting their staffs gaining more lanterns in a way like light.... chambers...... but yeah like just lol idk its interesting cos of what happen is that paradox here tho in a way?? like lol and to point it out be interesting

we honestly got so many scrolls saved here lol....

yea so this piece of wisdom it says that again, its about words and not actions in the halls of Osiris here...... like which depends on how light your heart be........

the problem with it all like my YT videos of my X posts saying again thoth could always find the truth here..... how bcos of so, the bad was punished and the good was rewarded.... the prob with that is all this im going through, like wtf we aint deserve this, we come with mad wisdom like pft thats all , like but we are rewarded in thy way of sharing the truth I guess.......... just the pt of thoth anyways is magic exists.... cos like it has to do with sex and also thy own nervous system...... like thats what the pillar is............ a coil.............. so all this is beyond stupidity tbh, like how you activate that is by nature like what is ADHD meds, a central nervous stimulant, like what am I suppose to not know what or how my medication operates, it helped thee huge, its worth dieing over honestly like we aint do things, im so mad like cos something works, they dont want me to win or be happy is how it feels

I think glyphs can spell bind the eye like cos its a piece of art though, like we hand em out here for that reason, like lol...... cos if you aint seen it before & you do like just in the above one like on the right side below the ankh and pyramid, the half circle, we checked it out before but see the dragon is on the left like hmm the eye in the sky in the pyramid.... like that you look at this glyph and you know they be knowing what is real here...................

I just all this like I said we couldnt be more stressed, but things be changeable is all we know..... and that life is hanging on by a thread ..... like dont know what to do that makes me happy like really here its like this paradox of medicines, all of it, the entity, like seeing what I see, I aint know what to do here like cos life again just you aint know the future but you could legit die like so just how do you play this game if nothing is free......... lol.... like idk what to do I couldnt feel more sick like as in evil mental loops like I dont know what to do imma go crazy like really I cant take thy stress on thee brain here ..... like just cos it seems like something else should be but it never is, nothing changed in forever here.....................

cos just idk like I said here just ate a little but just that either way, putting thy writings in cyberspace , just writing in general, like cos of all these paradoxes, when the truth be so simple, like so the stress on thy brain is insane like that this happened to me and nobody sees the truth like I just dont know what to do with myself here......... like I write and I dont care, like the wisdom says about the actual truth & shiva, like their is not good and bad, only the truth exists, and that is playing with fire, like again means I aint gotta accept the BS here, like thy energy will win at end of day by letting it manifest naturally here..... but yeah honest like what if this was your life......... like what would you do, how would you respond to this being your thoughts or some of them, like its never the full story here, always pieces be missing, just yeah idk , to have no direction in life, doing something you hate everyday, not a single other person influences thy mind here in a positive way, like allll this for what, to watch something suffer is what it be, like could be having fun like I said...............

who moves like this but the entity who knows I guess......... like either way the fact life went this way & nothing else is, like you aint experience what I have, everybody be different........ gotta respect relativity here.......................... but yeah like just cos it can be again, just like you never know......

Heavenly Cow

like we just wanna share our parallels bcos their is nothing to do here, like life and other ppl screwed me over here is what it says, what am I suppose to accept being bullied here when this heavenly gift of the mushroom is told to be oh you cant eat that but thoth says must be open to the flower of life......... like they dont want you to win either way..... never the full truth but part of it all....... like I just wanna feel comfy and its why again idk we took seroquel 50mg again mad light dose compared to zyprexa, but we have been comfy before, and with adhd when life goes right, like to take meds and have nothing gotta buy damn the fake weed shit , shit be real but not the same, and yeah like im super stressed here tho.........

the heavenly cow be tho an ancient book also..... bcos like just pft , its just again to me here the difference here is and why shouldnt I believe it cos its all a scam cos what happened, we were told no, and we flipped it to we on here like big sean once said....... or the world is full of ppl tryna flip your on switch from that song im on 3.0 again just we heard it when it dropped, music aint hit the same, nothing does anymore since 2018 likeee lol, but yeah idk just random ass thoughts, even in , im on 3.0, snoop is like its getting funky starting to smell like manure... how shrooms grow, see I aint listening to it rn we watching the eternaut stuck and trapped in memories here like that other song, a day to remember, resentment, and then why would he be lifted up like durk was in that one album I aint listen again but we saw.... lol like just that is how it feels it aint good at all....... like what greater gift can their be but medicine that works............ that is a magic trick..... this aint........ shrooms again melt thy brain like its unalterable like thoth wrote a tablet cos of it all, pretty sure it works.... what more proof do ye need lol........ =(

The Writer

just wanted a chapter called this so when or if its looked at the table of contents at the top like thats how people weigh things here words.... everything is a paradox.... lol , but yeah that is why we write.......... just like how the creator programmed reality in script & code................... the Universe was generated by the workman who built it with his fingertips, the writer lol, is what it says, same as how thoth builds the pyramid, again super cool, should be a contest like do fun things in society, life sucks ass, they dont want you to win is what it tells me, like the only truth their is here is this rabbit hole tbh............ like in a way.........

The Child of Light

Knows its just a game......

Not like the Others

the entity and all of this in totality be the stranger thing, thy experience lol.... like we went along with things and life and again its just like working at this place, pft like worst job ever in a sense...... like thy mental loops here........... like just it can be different...... we went all this way on our own here & aint nothing been here.......

like really what could be more strange .... lol like that this person has these experiences....... and plays life like this, why, cause they know the truth......

but yeah just in how our mind works, like again everybody got a gift, they can if they find it...... we dont judge others, like that to walk around after the entity be even more harder hitting than the next day of shrooms, like wow life was heavenly, but to see a shadow is more potent experience and it is derived from all of it like we got it right here and have been shamed, drugged, like drugs aint help, things have before tho like its just the simple truth to it all, like the dragon wants to fly again here...... lol

like just as I said, life be mad diverse, nothing stops anyone from getting with anyone ..... but loyalty, but like sticking to your own self aint nothing better in a way........ like so its taken for granted if so like again all this energy we have saved, to me, from all this being, the wisdom says it must be protected, & going outside my room or temple aint being protected like it works cos we sit here and do nothing else....... its been this way forever.... just we used to game or do things, but life has sucked so much like we cant take it here.......... in all ways, medicine exists, why is someone being denied that.... esp when they come with reasons, like its again just the problem with the world here, nobody got a clue , that nothing here is free even if its obvious like to say it or write it be what creates the paradox even more...........

What If...

regardless we wrote our original book here like last year..... bcos and these one again just trying to do the only thing I can do, but just yeah said it before but what if something does manifest......... what if I did die......... like atleast we left something behind here and tried........... lol for real tho and yah nobody might ever read it, but the paradox can be is that it takes 1 other....................... so how do you play the cards you are dealt here............. lol it all circles cant help it and we aint ever listen to that song but its thee entanglement of words................ like really to me, if ppl really knew my mind, they wouldnt bother me but theyd be like he got fked over in that sense........ like he knows something bout the matrix and the game, doesnt know what to do in life .... like what would you believe in if this was your experiences....... I mean the shadow breaks all paradoxes again on what is here, nothing is free cos of the entity to say the least, why thoth says that.................. its just again being spell binded by this by the creator and nothing else................ choosen, think what you want, we share it cos its the truth and how to manifest it in a way or summon it right like .... just idk we found the truth, aint do wrong things, like we aint abuse things except the wrong meds they give me, and not even like weve never except for nicotine been addicted to anything else in a way , the fact is just that ADHD meds tho work and it feels like again miserable, not wise, w.o it, like im always tired, my brain cant wake up............. but its been awoken before....... really has, just its cos we stay to ourselfs this has manifested..... cos no1 has believed me in how far we will take it or have a choice in it either at end of day, but to be stuck in this position be the worst..................................

its this manifesting again like this to me which is why we started writing more since it all happen, all sides of things here, between ariana or this person at my work, like all of it and nothing changes..... like its why we never again you aint know thee next move here ever.... says the entity lol but write maybe ahahah

thy medications

like its coming off meds and all that again, takes a toll on thy brain, like 10mg zyprexa to nothing again a little too much here.... 2.5mg was plentiful wouldnt as got this bad, but still like adhd meds help soothe thy brain is what hurts the most here again that paradox in all of this that 2pac song like we wrote so much on X tryna bring it to these cos we lost that, in a sense of recording memories I guess, like this is what happened tho and yeah like so just how could I feel good when again like I aint feel good ever here..... esp like taking them meds & then nothing like pft really a lil fake thc shit , im so stressed it aint funny, like just go the dispensary before, take a dab in my room or hit my bong before, like you think its funny I could cry and this been like the longest ever like aint shit change moment of my life here, years & years here cos the truth dont change............................. like what has happened to thee, what would you do again like .... just the yah thing about me is just idk like I said life be weird and playing it like nah like this is mad one sided in totality like all I do is get screwed these days........................ aint a reason to be alive.......... but we just keep on sailing on in this dream , like =(

but you dont know the again its all in thy mind, but to come off these meds and lower doses, what if I didnt have seroquel like the lighter dose med to help me out, it did getting off zyprexa and like the challenges we faced and took nothing like just idk my 1st dr said it to me once in a way like it can be true like just everybodys time comes I guess but like we are who we are here and just want a dr that sees my way and is no misunderstandings cos it can mean the difference between suffering so much here and actually getting to be happy =(cos ppl be evil tho like seriously a medication is all thy wants, and thc but thats it like pft, mad fun here life sucks, we dont drink thy poison here we aint dumb........ but yeah like idk what to do, my mind is running wild.... =(

I guess its why again just we can write so much rn cos of this all, like even being private on X , dont know, but know anything is possible like just idk what to do here............ but all of this be driving thee not feeling good at all here..................... like I said without the cure to ADHD meds, taking it for so long, all I feel is constantly motion sickness........ like extremely like esp cos of thee life changes like when someone needs it the most, its taken, when we took the risk here, like just shit you aint gonna tell me how to be comfy here...... just again having the right dr be key , cos everyone views things differently, again who knows, the psychology here behind the entity, all this, like we know the truth is all their is too it I guess................ like their is no other answer but it all........all we do have is thoughts........

Went Hollywood For a Year

the perfect title to this just again dont know thy next move we just use our history cos videos and type durk and again yeah like try to find this, give a million to who find it ahahah .... but yeah we had thc syrup when we heard this, it hit different, like.............................. =(, song vibes tho, I aint hear again energy be precise, we aint hear all songs from anybody , got our own story lol.... and we had ADHD meds back when he heard this song..... like I said just w.e happen durk was their in my music before all this other shit like we listened to that shit at work for awhile, used to keep up with it all more but things changed, but just gotta use whats their....... like yeah idk what to think we just again always doing something here .... lol like chances idk what someone listens to says alot bout it in a way it can, the world is too insane out their for me here like lol we stay on the down low always.......... cos just we already know how life be.......

does sum this up all rn like 1 year ago tho is legit when they took this to the next level for the wrong reason here..... like really, the artist or writer can generate any vibe, hes just writing though, like used it against thee.... just stupid af but yeah like idk point of having this library of music was cos of IK how its been without one.... like we listened to music alllll day like on our meds before and chilled, had mad wax lol .... legit like we went hard and for no reason at all nothing eveen happened....... just cos again like how we play is that its just it is what it is, nothing has to be at the same time anything can be, like if it aint just what it is, then it aint, like it just is.......... lol but yeah idk its all again we aint rewarded here in anyway or dopamine wise like in the moves we have made..... only thoughts like the truth doesnt change and what magic be dont change like it can be shit be dumb af rn like we aint ever be more stressed in all seriouseness.............

or like thoth says, like just give a million to who finds it.... thy answer to this paradox....... cos it is it....... like either way it is it, to what we know..... lol =(

like thoth says solve thy mysteries, and who did here......... who also didnt have a choice as much as thoth but to leave records............. writings............ like just the fact ppl think its untterable.. like as in aint no1 take it here where I can show someone how to see it .... like that is solving it all tho..... like all we got is thoughts.......... so why wouldnt they be........... what is.................. like thoughts with reason attached here like thee wings we got from flying, like thats cool you got a pilot license, or you got a license to make music, we got a license to fly here..... in our own body or out of it and soul ahaha =(

life just again wish something else was here........ like to go from their to here for the wrong reasons like this is just like again thy whole life been on thy line for ever here, like the fact with the meds like I aint feel good ever here........ dont know what to do ....

Divine and human consciousness

[32] 'Thus God and Eternity are the origin of all that is. But the cosmos, because it is in movement, does not have primacy, for its movement precedes its stillness, since its unchanging constancy is based on the law of everlasting movement.

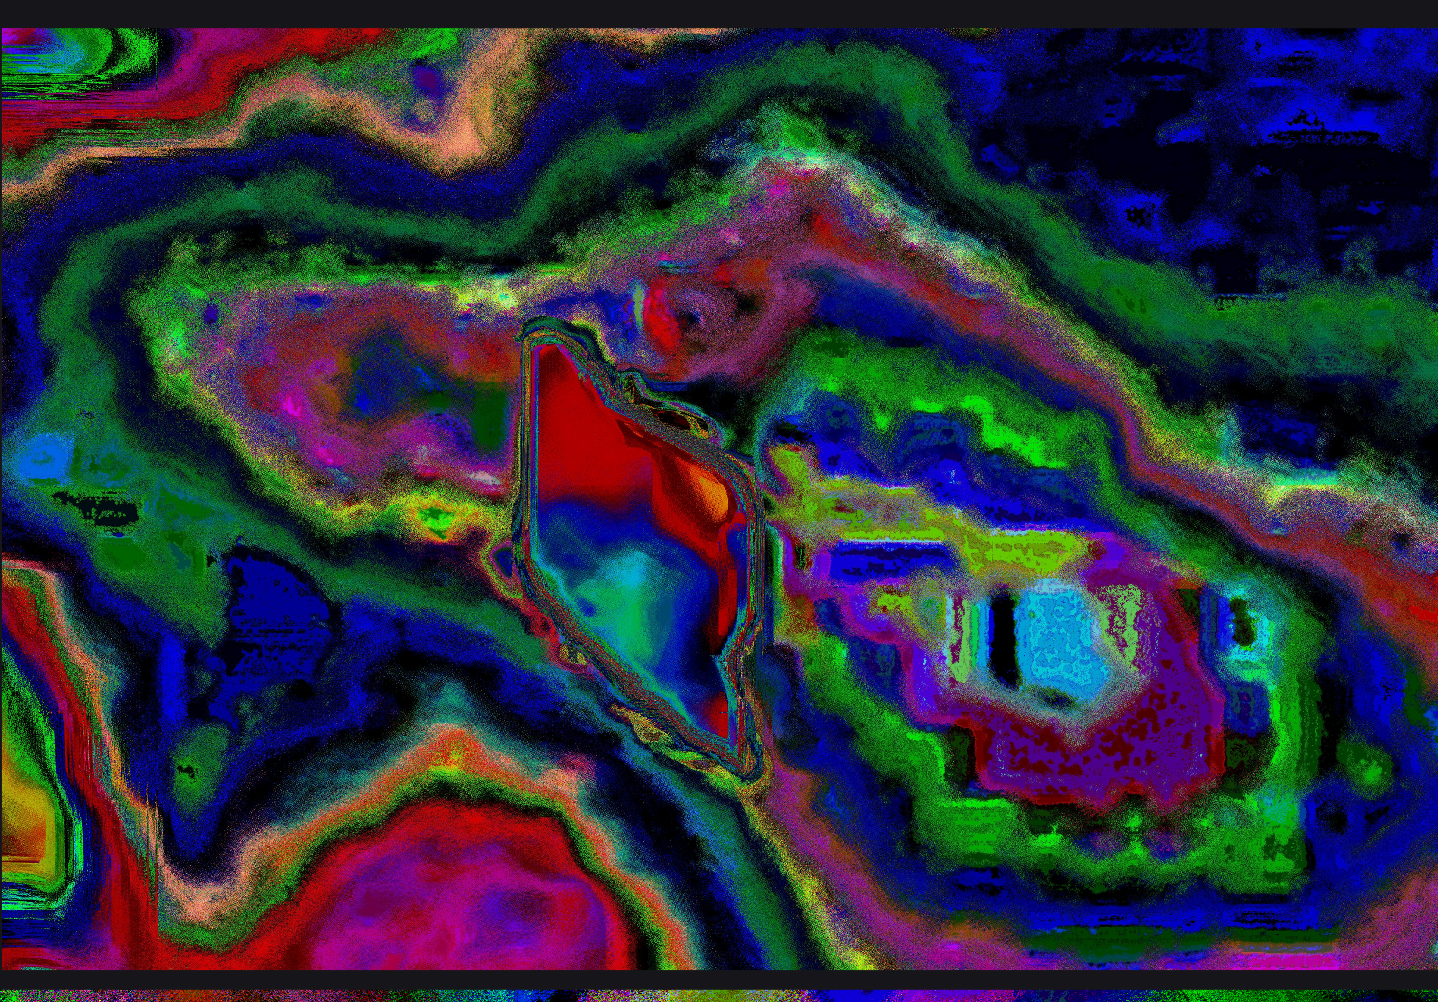
'Consciousness in its totality, being similar to divinity, is itself motionless, yet it moves itself within its own stillness. Consciousness is holy, uncorrupt and eternal and whatever can be named higher than that, if anything can be. Eternity abides in the very truth of the Supreme God. It is totally full of all sensory forms and of all knowledge. It abides, as it were, with God. Cosmic consciousness is a receptacle of all sensory forms and of all branches of knowledge. Man's consciousness depends on the tenacity of his memory, that is, the memory of all that he has experienced. But the divine consciousness in its descent reaches as far as the human being. For Supreme God did not wish divine consciousness to be poured into all living beings, lest it should be shamed at being joined to other creatures.

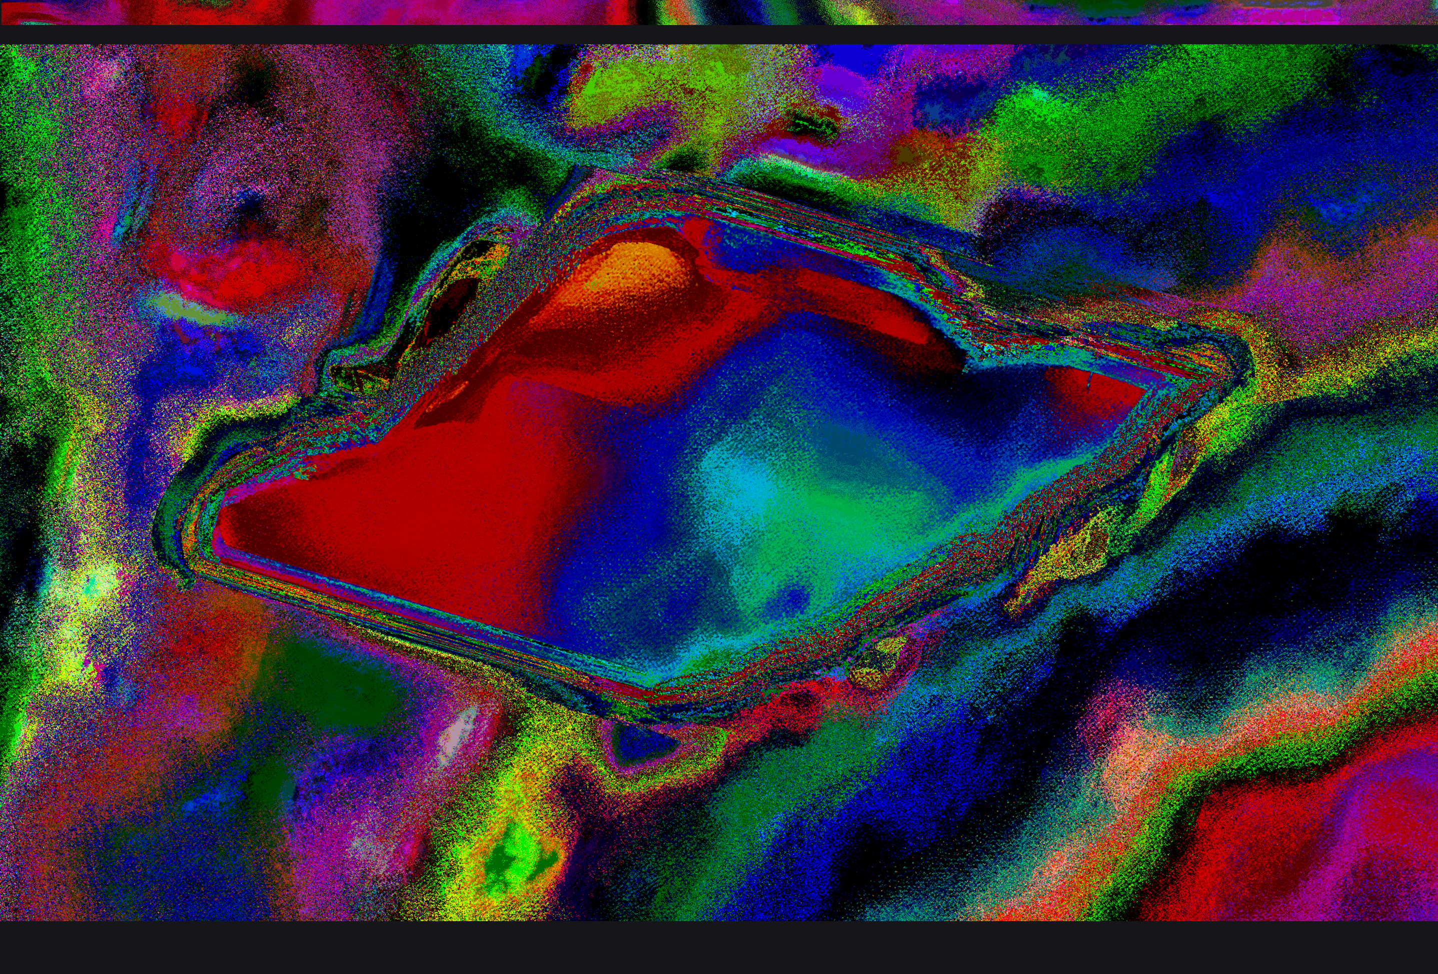
'Now the intelligence of human consciousness, be it of whatever kind or capacity, consists totally in the memory of past events, and through the tenacity of this memory it has become the ruler of the Earth. But the intelligence of Nature can be attained through the capacity of cosmic consciousness from everything which is subject to the senses in the cosmos. The consciousness of Eternity, which comes next, has also been bestowed and its quality made known by the sensory world. But the intelligence and quality of the consciousness belonging to the Supreme God is truth alone. Of this not even the faintest outline of a shadow may be seen on Earth. For where anything is known through the dimension of time there is falsehood.

'Where you see birth, there you see delusion. So you see, Asclepius, where we stand, what we are engaged upon and what we dare to attain. But to you, O Highest God, I give thanks, for Thou hast illumined me with the light of the Divinity that is to be seen. And you, O Tat, Asclepius and Hammon, hold these divine mysteries in the secrecy of your heart. Cover them with silence and conceal them with quiet.

'Now there is this difference between intelligence and consciousness: through concentration of mind our intelligence comes to understand and discern the nature of the consciousness pertaining to the world, but the intelligence of the world comes to know Eternity and the gods above. And so it happens to us men that, as if through a mist, we come to see what is in heaven, as far as this is possible through the limited nature of human consciousness. Although this power of ours to discern such exalted things is very limited, it is quite unlimited when it sees through the grace of pure consciousness.

Dragon in the Spaceship





top center above the ufo be like a dude in a chair its mad interesting....

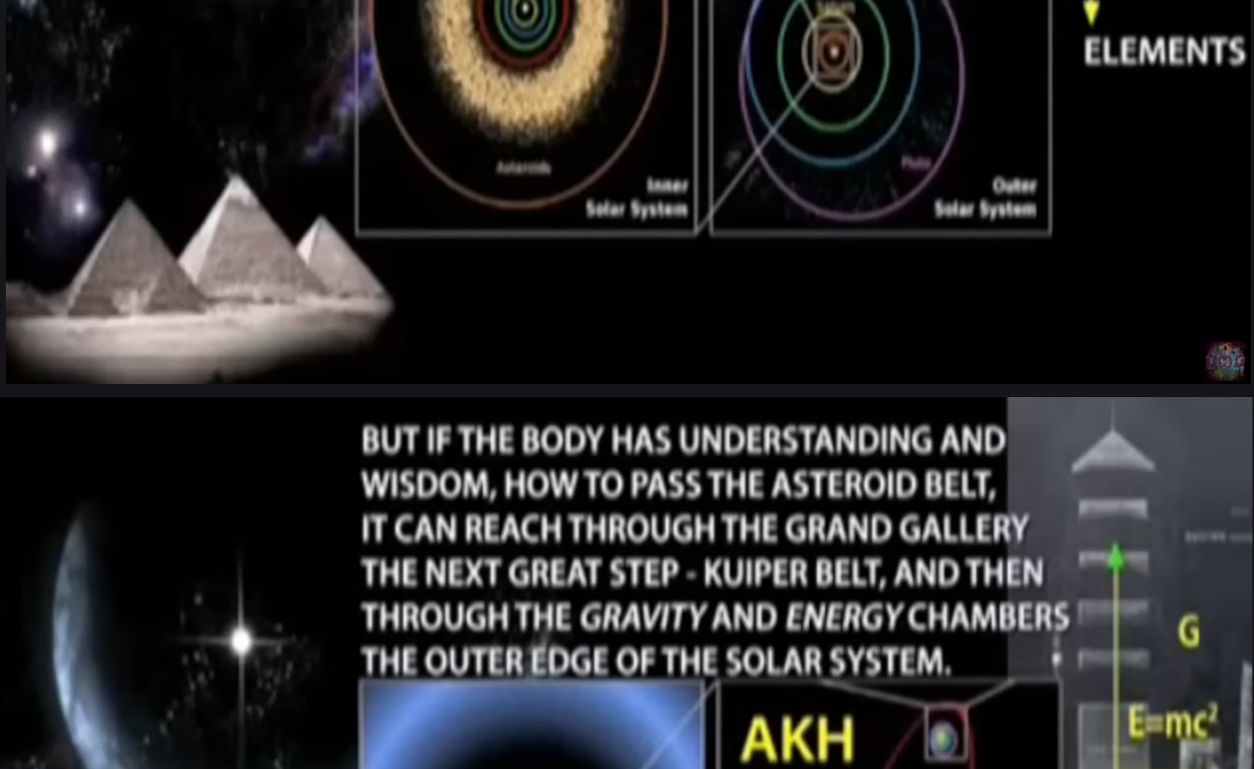
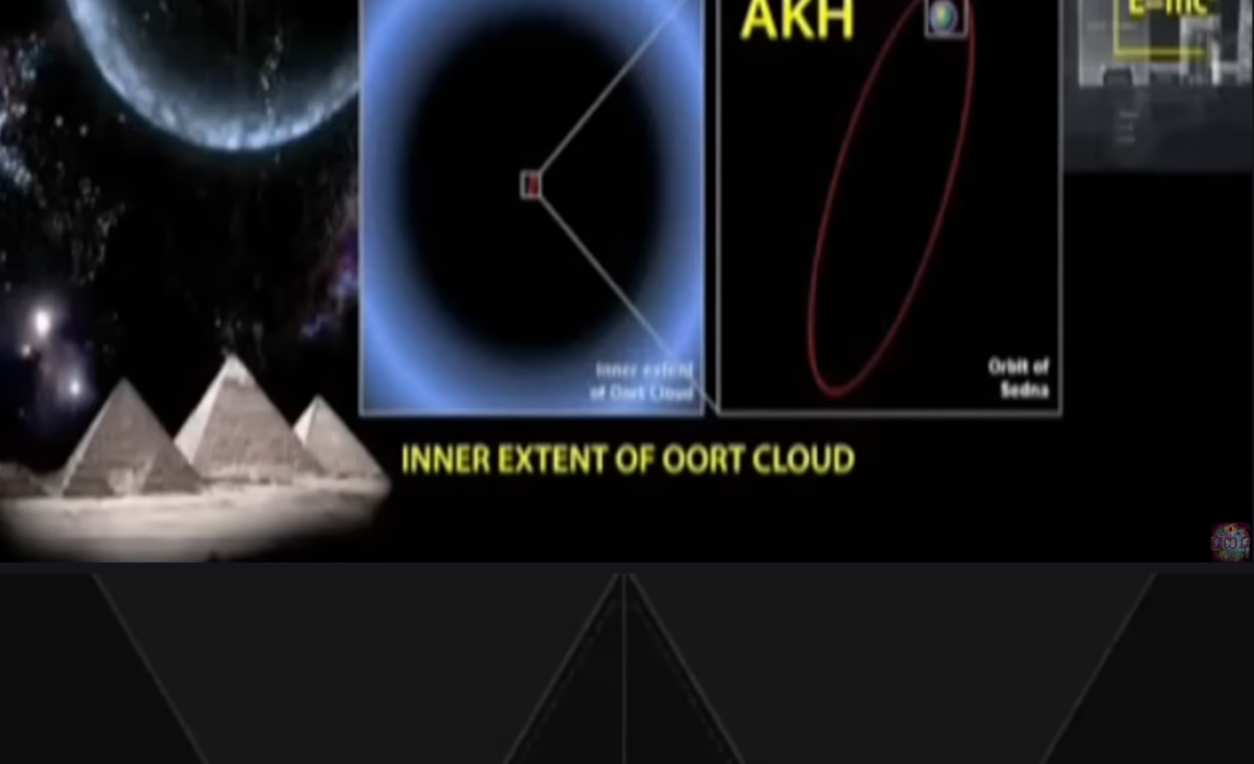
In ancient Egyptian mythology, Nut is the star-covered goddess of the sky who swallows the sun every evening and gives birth to it again each morning. This cosmic cycle explained the transition between day and night and symbolized eternal rebirth

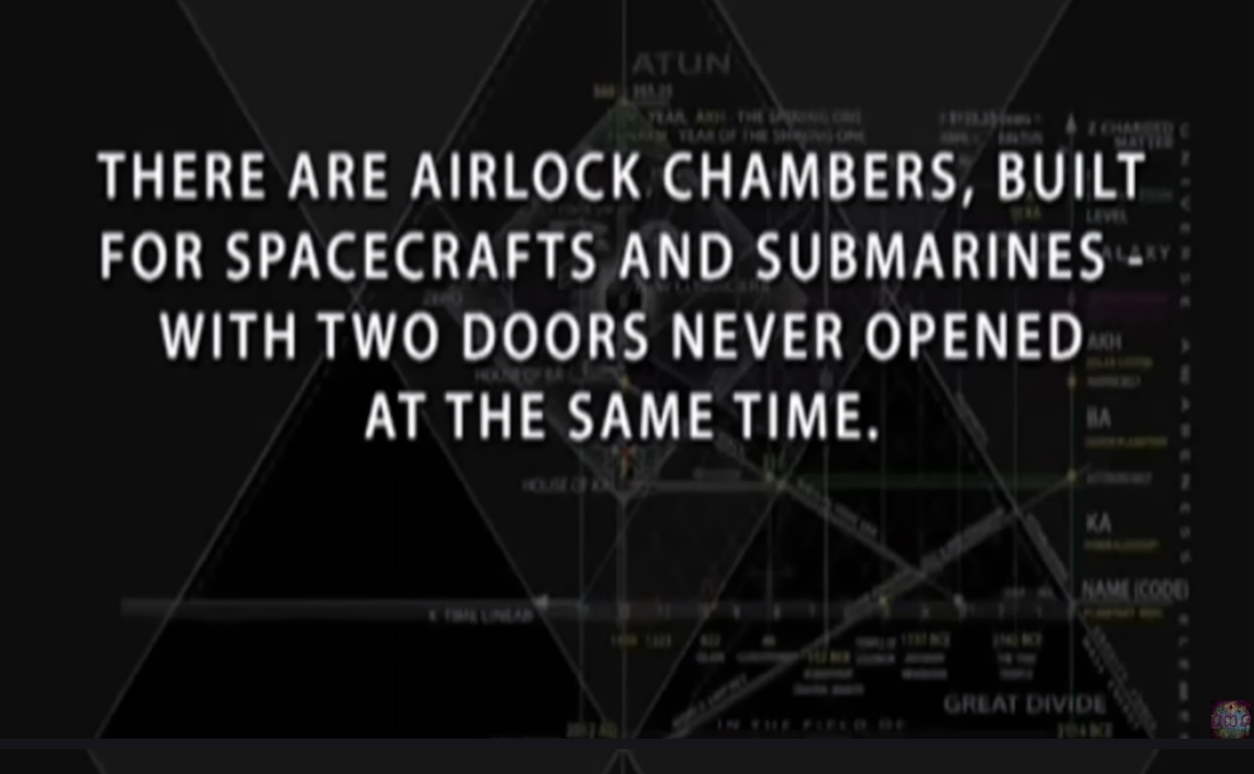
the entity

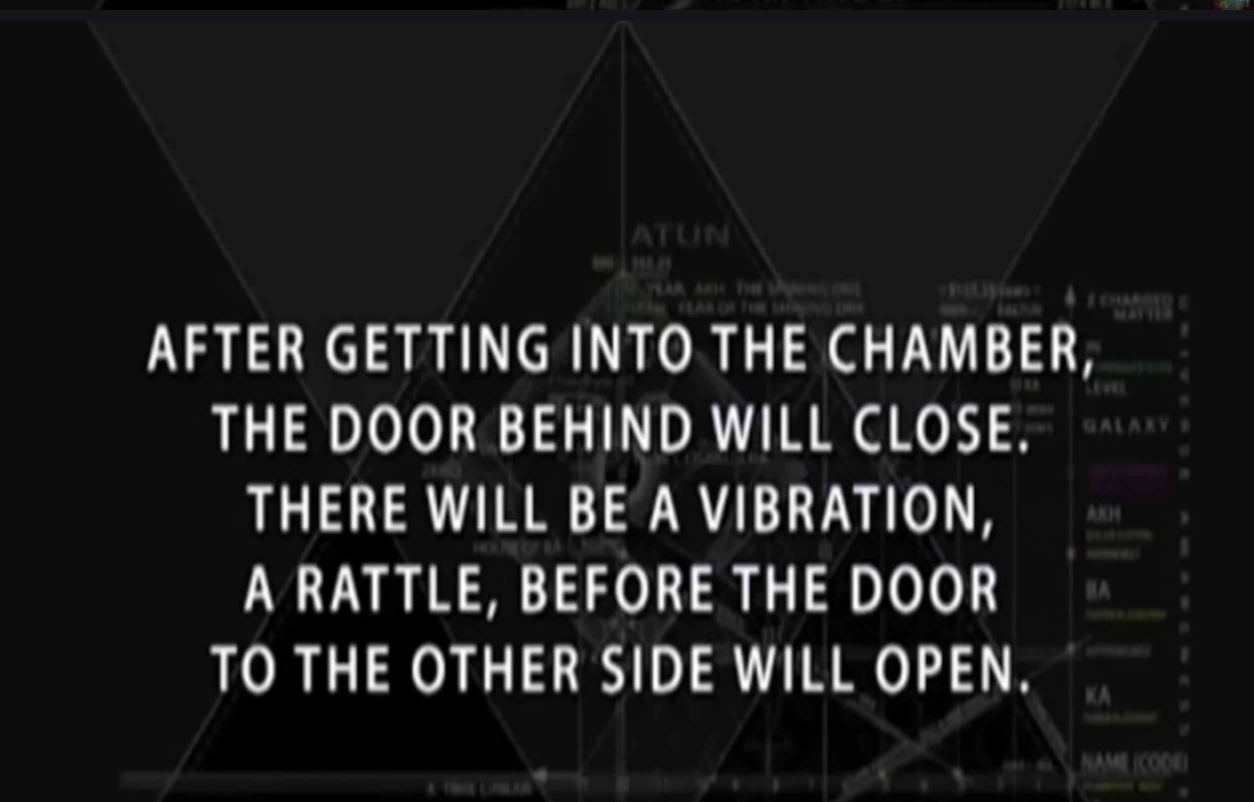
In the silence of material senses lies the key to the unveiling of wisdom. He who talks does not know; he who knows does not talk. The highest knowledge is unutterable, for it exists as an entity in lanes which transcend all material words or symbols.

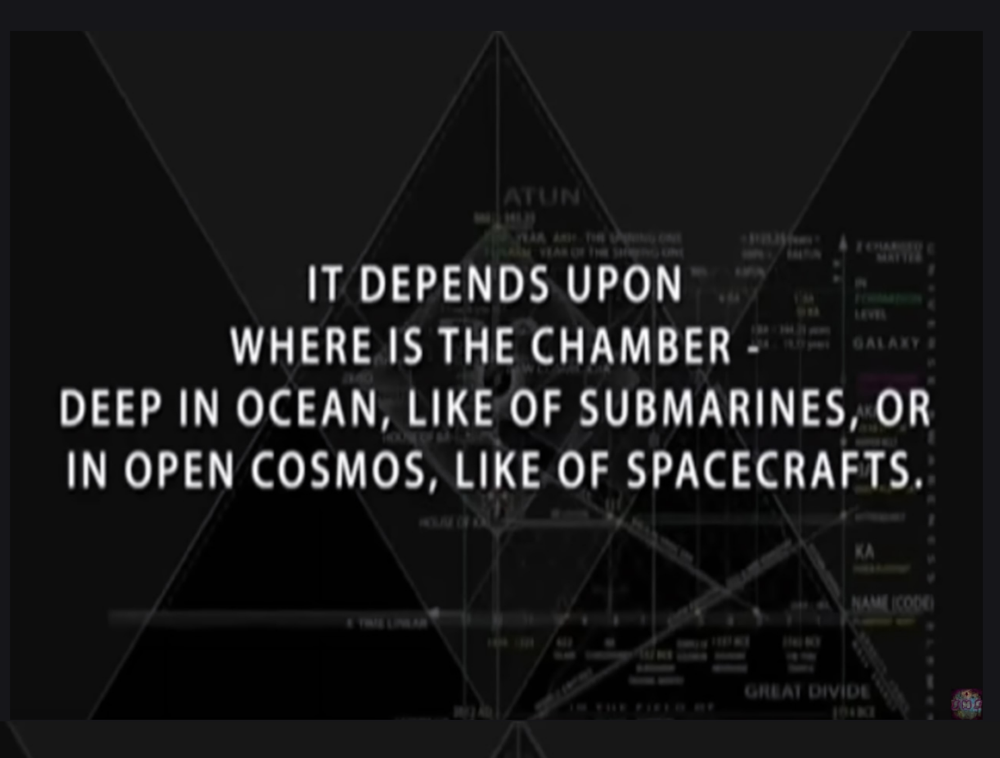
thoth's time temple

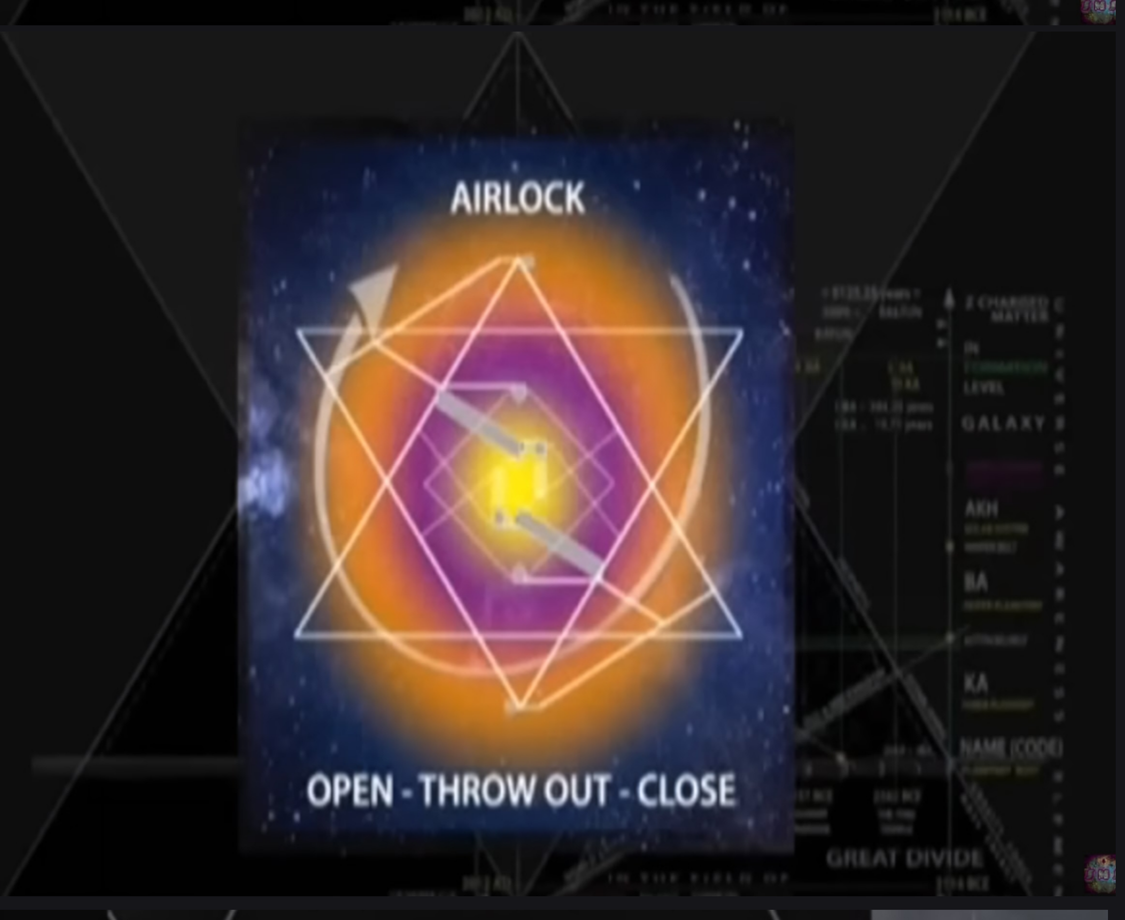












Last Words

Kinda just want to put this in the records and close this file... like that what it says consciousness is.... like it archives itself & then moves on like how the mind works itself.........

"The Box" is our reality, a virtual consciousness experience in linear time and emotion created by the patterns of sacred geometry. Creation takes place outside the box, consciousness grids, creating endless intertwined experiences to be played out in physical reality. In this case, 'Think Outside the Box' means viewing reality as patterns locked in time, encoded in our DNA through which we experience. When you think outside the box your consciousness moves beyond linear thinking.

like that idk its really alot, like thoughts we wouldnt really like again it aint just for everybody but thee one .... like how else do I express myself if this be thy truth, like we wise we write...... like how wisdom ever came to be, like descent must be excused cause we shared wisdom, and it aint been what is, its say born from heaven, take it for what you want....

just idk what happen is real & IDK what to do, atleast if I bundle it up like this and atleast try to get the word out, theirs more of a chance regardless of what be going on...

This cant go on forever

just when will something change here, this cant go on forever

I feel like again type of sacrifice but idk what to do.... like nothing I can if nothing is free..... like idc if ppl what they think cos these are my thoughts lol .... like by the time it is posted here cos we lost X like that again it will be archived and I be moved on here.................... but thoughts be real so like what like lol..... like their is a truth to this what has happened....... thats all....

their is legit nothing else to do here, theirs many paradoxs which led me to generating these little books you can call em.... like what am I to do with life.....

Solve thy mysteries

Then gathered I the sons of Atlantis. Into the spaceship I brought all my records, brought the records of sunken Atlantis. Gathered I all of my powers, instruments many of mighty magic. Up then we rose on wings of the morning. High we arose above the Temple, leaving behind the Three and DWELLER, deep in the HALLS 'neath the Temple, closing the pathway to the LORDS of the Cycles. Yet ever to him who has knowing, open shall be the path to AMENTI. Fast fled we then on the wings of the morning, fled to the land of the children of KHEM. There by my power, I conquered and ruled them. Raised I to LIGHT, the children of KHEM. Deep 'neath the rocks, I buried my spaceship, waiting the time when man might be free. Over the spaceship, erected a marker in the form of a lion yet like unto man. There 'neath the image rests yet my spaceship, forth to be brought when

need shall arise. Know ye, O man, that far in the future, invaders shall come from out of the deep. Then awake, ye who have wisdom. Bring forth my ship and conquer with ease. Deep 'neath the image lies my secret. Search and find in the pyramid I built. Each to the other is the Keystone; each the gateway that leads into LIFE. Follow the KEY I leave behind me. Seek and the doorway to LIFE shall be thine. Seek thou in my pyramid, deep in the passage that ends in a wall. Use thou the KEY of the SEVEN, and open to thee the pathway will fall. Now unto thee I have given my wisdom. Now unto thee I have given my way. Follow the pathway. Solve thou my secrets. Unto thee I have shown the way.
